Sure. Just a moment, connecting.
Dear Readers,

I am happy to share VTB Group’s Sustainability Report for 2020.

This past year was a serious challenge for all of us. By coincidence, it was also a milestone for VTB in its own way: the Bank celebrated its 30th anniversary, a landmark in its development as a systemic financial institution. Over the past decades, the Group has been actively involved in tackling key issues on the national and global economic and social agendas.

An important reference point in this work is the UN Sustainable Development Goals. They provide a broad framework for our engagement with shareholders, customers, partners, employees, regulators and other stakeholders in implementing the long-term priorities of the economy, state and society.

Despite the difficulties of 2020, VTB made it through with good ease. The Group proved good operating results. The aggregate loan portfolio grew by 15%, and the customer funds - by 17%. Key banking income - net interest income and net fee and commission income - respectively grew by 20.7% and 12.5%, in Russia the number of VTB customers increased by 14.9 million.

Alongside strong dynamics of banking income, however, external factors had a significant impact on our financial results. First of all, it was an objective worsening of the economic situation due to volatile oil prices and exchange rates. Like the rest of the sector, we faced a sharp increase in the cost of risk, which forced measures to help clients facing financial difficulties due to the pandemic situation. As part of programmes put in place by the Government of the Russian Federation, the Group provided financial assistance to approximately one third of systemic enterprises in the Russian Federation.

In 2020, we expanded our programmes improving housing affordability. The total volume of our mortgage portfolio increased by 18% in 2020 and reached RUB 2 trillion. More than 62 thousand mortgages were issued under the state mortgage support programme worth RUB 198 billion. The Bank launched its own mortgage programme to support families with children.

VTB’s effectiveness under COVID-19 restrictions were largely made possible by a profound technological transformation, which was launched in line with the Group’s Development Strategy for 2019-2022.

Due to a significant increase in the amount of online transactions, the Bank was fully able to provide a high-quality remote customer service. We continued to push innovative products onto the market. During the most severe part of lock-down period, for the first time in Russia, we implemented and continued to scale remote online mortgage transactions, and were the first of the largest banks to provide the possibility of remote account opening by using biometrics. The VTB My Investments mobile application demonstrated a five-fold growth in terms of user numbers.

With reference to the aforementioned technical transformation projects in 2020 included the launch of a new version of the retail mobile application VTB Online, demonstrating a 230 million users.

These innovations allowed us to create more convenient, accessible and reliable products and services for our customers, and to increase the Bank’s internal efficiency significantly, and to improve the accessibility and quality of banking services available for individuals and businesses.

The number of VTB customers in Russia increased to 14.9 million.

Andrey Kostin President and Chairman of the Management Board, VTB Bank (OJSC)
Many new digital solutions in 2020 focused on small and medium enterprises. Largely as a result, VTBs customer base in this segment increased by 25%, to almost 640 thousand. We believe that the successful activities of small and medium businesses are a significant factor in the development of our communities, increasing the economic activity of citizens and promoting the well-being of society as a whole. Supporting these businesses is one of our main priorities.

In 2020, an important decision was made to transform VTBs sustainability policy from stand-alone projects and initiatives into a fully integrated part of the Group’s business: the VTB Bank Sustainability Strategy preparation was almost completed. Key areas of the Strategy include responsible investment, customer relations with regard to improving the ESG characteristics of their business, customer involvement in ESG projects and initiatives, plus support for socially significant projects, sponsorship and charity, as well as the development of an ESG management model.

Most of the initiatives laid out in the Strategy have been implemented by VTB for some time. These include responsible investment instruments, the financing of renewable energy projects, environmental requirements for infrastructure projects supported by VTB, environmental charity support and environmental initiatives for retail customers.

VTB was the first Russian bank to launch two responsible investment funds and a programme with an embedded charity, under which part of the remuneration paid to the management company was used for charitable purposes.

In 2020, the Bank launched a green pilot lending programme, providing customers with financing for environmental projects and initiatives in order to improve the sustainability parameters of their businesses.

VTB continued its involvement in the conservation of big cats. Since 2016, we have supported WWF Russia’s project to protect and monitor the snow leopard, Amur tiger, Amur and Persian leopards, and since 2014 and the Amur Tiger Centre. Together with the Ministry of Natural Resources and Environment of the Russian Federation in 2020 we prepared to get VTB involved in the implementation of the national project Ecology, including the conservation of the Persian leopard in the Caucasus - we started our participation in 2021.

Reducing our own carbon footprint remains an important focus area for us. In particular, a significant reduction in paper consumption has been achieved due to the Bank’s technological transformation, including the Paperless Bank programme.

We also consider financial literacy to be an important component of the availability of our financial services. VTB is one of the founding members of the Russian Financial Literacy Development Association. In 2020, we implemented 15 thematic educational projects, including a series of events for schoolchildren and students.

For several years VTBs charitable works were structured around six large-scale targeted programmes to support sports, education, healthcare and culture, and to preserve traditions and improve business environment.

In April 2020, we registered the VTB Country Charity Fund to coordinate the implementation of projects in the regions. The Fund became the main operator of our corporate programme World Without Tears, which has been in place since 2003, as well as being a channel for providing aid to medical institutions during the COVID-19 pandemic in the past year.

Through VTB and the VTB Country Charity Fund, hospitals in dozens of Russian regions that have been dealing with coronavirus infection received help worth a total of RUB 326 million.

During the lock-down, it was especially important for us to support our long-term partners in the cultural sector. One of the online events with the cooperation of VTB was an exhibition titled Artists and Collectors - To the Russian Museum, which received over 11.5 million online walking tour views on social networks.

As a big employer, VTB pays particular attention to the sustainability of its HR policy. The Bank ranks among one of the best employers in Russia. Our strengths include an open, employee-focused corporate culture, a high level of training programmes and attractive employment and social packages.

In 2020, we launched a large-scale Career Routes programme focused on the regional network and aimed at creating a comprehensive system of support for personnel growth and promotion within the Bank. Today the total number of employees within the VTB Group is approaching the 75,000 mark.

I am confident that VTBs concerted efforts in the field of sustainable development will allow us to continue to make a significant contribution to meeting national and global challenges, whilst our 30-year history, accumulated expertise and deep involvement in promoting this agenda in Russia will remain a solid foundation for effectively achieving all of our objectives.

Sincerely,

Andrey Kostin
President and Chairman of the Management Board, VTB Bank (JSC)

---

1. The 2018-2019 figures are presented in the amount approved at the time of publication of the IFRS statements without further adjustments or reclassifications.
2. The values presented differ from those in the 2020 Annual Report due to the difference in the perimeter of the indicators. The perimeter of the Sustainability Report is specified in the ‘About the Report’ chapter.
3. The total staff turnover (outflow of staff) is calculated as the ratio of the total of employees who left the company of their own accord, were terminated for other reasons, retired, or passed away as an employee of a company to the average headcount.
4. The growth of total power consumption in 2020 is connected with the necessity of the uninterrupted operation of the whole complex of process equipment in the mode when 50 to 70% of employees work remotely.

During the COVID-19 pandemic:
- 300 billion roubles – repayment holidays for more than 400,000 VTB retail customers;
- 1.3 trillion roubles – restructured loans to large corporate customers;
- VTB has restructured loans to medium and small-sized businesses worth about 230 billion roubles.
VTB'S RESPONSE TO THE COVID-19 PANDEMIC

IN 2020, THE WORLD FACED A REAL THREAT ON SUCH A LARGE SCALE. THE COVID-19 PANDEMIC PERVADED ALL ASPECTS OF LIFE AND AFFECTED NUMEROUS COUNTRIES AND COMPANIES. DURING THIS CHALLENGING PERIOD, THE BANKING SECTOR HAD A PARTICULARLY IMPORTANT, PIVOTAL ROLE TO PLAY IN SUPPORTING THE ECONOMY AND CITIZENS.

VTB's response to the COVID-19 pandemic

Since the onset of the pandemic, VTB was able to radically restructure its operations in a very short time, and was able to reconfigure all key processes without losing efficiency, and also to achieve a new level of customer service.

Within the first month of the pandemic, more than 20 thousand employees switched to working remotely for safety reasons. We also solved the problems related to disinfecting premises, searching and switching from paperwork to an electronic format of data exchange, including work with government agencies.

The coordinated work of all the Bank’s departments made it possible to support hundreds of thousands of people across the country.

As part of its customer support, VTB offered the following solutions:

- **Interest-free loans** for paying salaries to employees;
- **Special preferential applications for refinancing current debt**;
- **Restructuring** of existing loans both on the principal, interest and fees;
- **Information support** for entrepreneurs through a special section on the Bank's website vtb.ru/stayhome, which contained answers to typical questions on conducting business under the pandemic conditions, information on products and remote services, and advantageous offers from our partners;
- **Expansion of online services**: online reservation of current accounts, fully remote receipt of documents from customers to open accounts and update information on individual entrepreneurs and legal entities, online business registration, the provision of online services for the automation of procurement and sales, connection of mobile application Cifra for accounting and tax document flow.

With the spread of the coronavirus, small and medium businesses were particularly in need of support.

One of the most large-scale programmes of assistance to small businesses was the programme of state support for small and micro-enterprises from the industries most affected by the COVID-19 pandemic.

VTB received over 9.8 thousand applications from entrepreneurs under the state programme of interest-free loans to pay salaries to their employees. The first interest-free loans were granted to the Bank's customers for up to six months, and later the term of financing was increased to 12 months with a partial subsidising of the interest rate for the first six month period. Under this programme, the Bank approved loans worth a total of RUB 26 billion to medium and small business customers.

In addition to participating in government support programmes, VTB launched its own SME lending programme in 2020, providing loans to the amount of more than RUB 93 billion.

There was high demand for loan restructuring programmes, which attracted more than 7 thousand applications from small and medium businesses. The Bank worked in this area both under its own deferment and refinancing programmes, which attracted up to 10 years, taking into account an individual approach to the lender, and under government programmes for reducing interest rates by two thirds and providing repayment holidays for six month.

The total volume of approved restructuring for small and medium businesses amounted to RUB 230 billion.
Supporting large employers

An important area of VTB’s work in this time was to support sectors of the Russian economy and large enterprises that were most affected by the pandemic.

Since the beginning of April 2020, deals with large corporate customers worth over RUB 1.3 trillion have been restructured. VTB restructured loans to 75 groups of enterprises, or 30% of all systemic enterprises with loans from VTB Group.

VTB also supported large enterprises within the government loan programme to resume business. While working on this programme, VTB has provided support to customers, designed to save more than 1 million jobs in total. In 2020, 21 thousand loan agreements were signed at an annual interest rate of 2%, amounting to over RUB 92 billion. If the number of employees remained over 90%, the loan debt under the programme was fully written off. If the number of employees remained over 80%, the government reimbursed the banks 50% of the borrower’s debt.

Financial solutions for Aeroflot PJSC during the COVID-19 pandemic

VTB CAPITAL ACTED AS THE SOLE GLOBAL COORDINATOR AND BOOK-RUNNER IN THE RUB 80 BILLION EQUITY INCREASE FOR AEROFLOT.

Due to closure of borders relating to the spread of COVID-19, the air transport markets around the world were significantly affected. Russian and foreign airlines were faced with the need to consider financial solutions that would allow them to support their business, preserve jobs and infrastructure availability in order to fully resume flights after the restrictions were lifted.

The placement of the additional issue was a balanced financial solution that allowed Aeroflot to raise funds in order to support its operations whilst maintaining an optimal debt load. Aeroflot plans to use the funds raised in the course of the offering for general corporate purposes and for debt load reduction.

This deal was unprecedented for the Russian market in terms of volume (in fact, the company more than doubled the number of shares outstanding) and structure.

There was a balance of interest in all parties within the deal:

- The company that attracted the necessary amount of funds;
- The main shareholder represented by the state that did not have to significantly increase its stake within company;
- Investors who had an opportunity to participate in the deal through pre-emption right and public offering with a transparent and market-based pricing mechanism.

Support for retail customers

From the very introduction of COVID-19 restrictions, VTB made supporting citizens in a difficult financial situation a priority.

Around 400 thousand VTB customers received repayment holidays in the sum of around RUB 300 billion. State programmes and the Bank also implemented these measures.

VTB was the first bank to begin accepting government mortgage programme applications at reduced rates. More than 63 thousand families have already taken advantage of these rates, for a total of over RUB 198 billion. The programme became an effective measure to support the construction industry and improve living conditions of citizens.
Ensuring the smooth operation of the banking sector

During the COVID-19 pandemic, VTB’s most important undertaking was to maintain normal timing and the volume of banking turnover in order to avoid disruptions in business and social support for citizens across the country. VTB managed to ensure the full operation of all of the most popular customer services and functions, including domestic and international money transfers.

Availability of online services

In order to minimise the number of customer visits to its offices, VTB made a breakthrough in terms of using the latest technology to develop its products. In April 2020, the number of services available to customers through remote channels increased significantly. Thus, remote account opening for retail customers using biometrics, applications for repayment holidays payment deferral via chat-bot and online mortgage transactions became available.

High standards for continuity of service

During the self-isolation rule introduced in April 2020, VTB made every effort to ensure uninterrupted operations. Customers continued to make their usual transactions, while the full range of usual services remained available via remote channels. VTB did not stop producing, delivering or issuing cards at the Bank’s operating branches, while salaries and other payments continued to be credited to customers’ accounts and the speed and quality of transactions in the accounts of medium and small business customers were maintained at the same level.

Under the imposed restrictions, VTB was able to provide services for all their priority customer group of foreign trade participants using remote banking channels within the established deadlines, from taking on new contracts to quickly processing currency controls for cross border transfers and verifying transaction documentation. These measures proved particularly important for contracts for the purchase of medical equipment and personal protective equipment.

In addition, many companies working with foreign partners under the current situation of international isolation, partial closure of borders and the emergence of new barriers regarding businesses needed help in adapting to foreign trade contracts, while salaries and other payments continued to be credited to customers’ accounts and the speed and quality of transactions in the accounts of medium and small business customers were maintained at the same level.

The Bank also successfully detected and prevented fraudulent schemes, despite the noticeable activation of criminals who began using new types of social engineering attack techniques.

Maintaining territorial accessibility

The bank continued to support the operation of 15.5 thousand ATMs and 850 of its branches nationwide. All sales offices were divided into several types based on the criticality of maintaining uninterrupted operations in prevailing epidemiological conditions. The score was based on a geographical approach: if there was only one sales office in a settlement, it was critically important to ensure its operation; if there were several, the offices with the highest volume of transactions were selected.

Thanks to timely and well-coordinated actions, the Bank managed to maintain uninterrupted operations in all regions of the Russian Federation. In order to prevent the spread of Coronavirus infection, employees in each office were provided with all the necessary personal protective equipment (masks, gloves and antiseptic). All VTB offices implemented the "1.5 m social distancing" marking. VTB customers were advised not to visit the offices but to make remote use of banking services instead.

Areas of assistance in the fight against COVID-19

Building and re-equipping hospitals to meet the needs of COVID-19 patients

Purchasing personal protective equipment for medical and social workers

Organising the transportation of patients and doctors

Purchasing medicines

Providing communication facilities for educational and scientific purposes

The issue of providing urgent medical assistance became particularly acute in the spring of 2020, when the number of infected people in the country began to rise. In response to this situation, VTB provided a total of RUB 262.2 million for 40 charitable projects implemented by healthcare institutions and non-profit organisations in 21 regions of the Russian Federation.

Help in the fight against the COVID-19 pandemic

In addition to helping citizens and businesses through its operations, VTB allocated over RUB 262 million of charitable support to medical institutions and NGOs combating COVID-19.
Since 2007, a total amount of 18 billion USD of Russian and foreign investments have been raised for the infrastructure of the Russian Federation, including 6.5 billion USD in loans and funds from the VTB Group.
VTB GROUP AT A GLANCE

VTB GROUP IS ONE OF THE LARGEST FINANCIAL GROUPS IN THE RUSSIAN FEDERATION AND ONE OF THE LEADERS IN THE GLOBAL FINANCIAL SERVICES MARKET. THE GROUP INCLUDES OVER 20 RUSSIAN AND FOREIGN COMMERCIAL BANKS AND FINANCIAL COMPANIES OPERATING IN ALL KEY SEGMENTS OF THE FINANCIAL MARKET.

VTB Group is built on the principle of a strategic holding company

Our values

VTB Team

WE VALUE OUR CUSTOMERS
We put our customer needs first. We trust our customers and strive to earn their trust. We listen to our customers and act upon their feedback.

WE WORK AS A TEAM
We respect and trust each other. We support each other and help our colleagues grow. We achieve common goals.

WE ARE RESPONSIBLE FOR OUR RESULTS
We are result-oriented, not process-oriented. Each of us is responsible for our contribution to the common goals. We openly discuss our successes and failures.

WE ARE PROACTIVE
We are not indifferent to what we are doing. We contribute proactively when dealing with shared tasks. We go beyond our formal duties.

WE CONTINUOUSLY IMPROVE OUR PERFORMANCE
We are open to change. We start change with ourselves. We are not afraid to experiment.
BUSINESS MODEL AND MARKET PRESENCE

The Group operates in all key segments of the financial market. Corporate and Investment Business, Medium and Small Business, and Retail Business represent the Group's global business lines, specialising in servicing different customer segments.

The Group has a network that is unique for Russian banks. The Group operates outside Russia through subsidiaries and associated banks that are located in a number of countries in the CIS, Europe, and Asia, which supports the development of international cooperation and the promotion of Russian companies in global markets. At the end of 2020, the Group's banking and investment banking business was active in 18 countries around the world.

The Group operates outside Russia through subsidaries and associated banks that are located in a number of countries in the CIS, Europe, and Asia, which supports the development of international cooperation and the promotion of Russian companies in global markets. At the end of 2020, the Group’s banking and investment banking business was active in 18 countries around the world.

RETAIL BUSINESS
• Loan portfolio RUB 3.81 trillion
• 100% of products available through digital channels

• Loan portfolio RUB 1.61 trillion
• 636 thousand active customers2

CORPORATE AND INVESTMENT BUSINESS
• Loan portfolio RUB 7.41 trillion
• 21% market share for investment products of individuals (according to VTB Capital as of 31 December 2020)

Strategic development priorities 2019-2022

1 Improving customer focus
2 Digitalising the business
3 Developing in the digital economy
4 Creating a cutting-edge operating platform
5 Creating a highly effective organisation and culture

Stakeholder impact results in 2020

No. 1 on energy service factoring

>63 thousand families
received RUB 198 billion in preferential mortgages under the government support programme since its launch

>50 billion RUB
lending for environmental projects, including renewable energy

15.8 billion RUB
VTB was the organizer of the first Russian Green Eurobonds (issued by Russian Railways OJSC)

3.81 trillion RUB
loan portfolio

Before provisions for loan impairment.

1 Active SME customers are existing customers that have either non-zero net operating income over 12 months before the reporting date or have active salary project cards as of the reporting date.
VTB is focused on long-term and sustainable development and is building its business in such a way as to provide maximum contribution to social and economic development of the countries and regions where it operates, as well as to meet the expectations of its clients.

Financial results for the year

The new challenges of 2020 required significant development of VTB’s business model, an increased focus on customers and their needs, as well as the acceleration of internal processes and optimisation of the Group’s operating model.

Throughout the year, the Group implemented a number of reference technological transformation projects. Specifically, a target technology layer was introduced for a single omni-channel platform that allows customers to continuously use key services and products through any convenient channel (in an application, at offices, in a personal account, in a call centre, etc.), changing the way they contact the Bank easily and without restrictions.

As part of our technology transformation strategy, we continued to integrate robotised solutions and machine learning technologies into our digital services, such as the investment recommendation service VTB My Investments as the investment recommendation service and their needs, as well as the acceleration of internal processes and optimisation of the Group’s operating model.

The volume of applications to be processed in the app. VTB also transferred the creation of all pre-approved in the background of VTB Capital Investments’ increased scale and their needs, as well as the acceleration of internal processes and optimisation of the Group’s operating model.

as the investment recommendation service VTB My Investments and their needs, as well as the acceleration of internal processes and optimisation of the Group’s operating model. 

The aggregate loan portfolio grew by 15% year-to-date, mainly due to the expansion of corporate lending amid the ongoing economic recovery.

The portfolio of loans to individuals increased by 14.6% year-to-date, mainly due to growth in mortgage lending, partially offset by a decline in auto loans.

As of year-end 2020, the Group showed a significant increase in the share of current accounts in total customer funds, from 35.2% as of 31 December 2019 to 40.1% as of 31 December 2020.

As of 31 December 2020, the Group’s joint liabilities amounted to RUB 16.4 trillion, up 18.4% compared to 31 December 2019.

The growth of customer funds of legal entities amounted to 19.6%. The growth of customer funds of individuals amounted to 13.8%, including the growth of balances on brokerage accounts and escrow accounts used in the purchase of housing from developers.

The Group’s mortgage portfolio increased to RUB 122.4 billion at the end of the fourth quarter, mainly due to VTB’s active participation in the government mortgage support programme launched in April 2020.

The portfolio of loans to legal entities increased by 14.9% year-to-date, mainly due to the expansion of corporate lending amid the ongoing economic recovery.

As of 31 December 2020, the Group’s net income for the year was RUB 75.3 billion, down 62.6% year-on-year due to higher provisioning costs and negative revaluation of non-financial assets amid the COVID-19 pandemic;
Mission, vision and strategy

We help people make their plans a reality by creating the best financial solutions.

We are a team of professionals, working for the benefit of our clients and the country as a whole.

Mission

Universal financial group
Financial partner of first choice
More than a bank
An agile bank
Convenient, cutting-edge solutions

Vision

Universal financial group that is developing both dynamically and sustainably, one that is focused on being the first-choice financial partner for its customers and which provides the most convenient and cutting-edge solutions to their needs.

Vision

Vision strategy

Strategic priorities for implementing the vision

1. Improving customer focus
2. Digitalising the business
3. Developing in the digital economy
4. Creating a cutting-edge operating platform
5. Creating a high-performance operating culture

Strategy

Directions for a new sustainability strategy

Financing social and environmental projects
Development of ESG funds
Providing financial products that promote green lifestyles
Engaging customers in an ESG-oriented product line
Customer stimulation to improve their sustainability performance
Deductions from credit and debit cards for environmental and social projects
Accessibility of digital services for entrepreneurs
Support in the development of superservices for public services
Accessibility and security of digital technologies for the Bank’s customers
Reducing our own ecological footprint
Improving the structure and reducing energy consumption, switching to paperless document flow
Contributing to the UN Sustainable Development Goals

VTB’s strategy up to 2022 and the development of the Group’s responsible banking practices are integrated into the context of achieving the UN Sustainable Development Goals (SDGs).

VTB’s mission, values and vision are aligned with the implementation of all 17 UN Sustainable Development Goals. In 2020, as part of preparations for the development of the VTB Group’s Sustainable Development Strategy, a comprehensive analysis of various aspects of VTB’s activities and their contribution to the UN SDGs was conducted. As part of this analysis, it was decided to reduce the number of priority goals from 8 to 6 in order to improve the tracking of results for the achievement of these goals and the development of target indicators for the VTB Sustainability Strategy.

Goal 4: QUALITY OF EDUCATION

Objective: 4.4

Goal 8: DECENT WORK AND ECONOMIC GROWTH

Objectives: 8.2 8.3 8.4 8.5 8.10

Goal 9: INDUSTRY, INNOVATION, AND INFRASTRUCTURE

Objectives: 9.1 9.3 9.4

Goal 11: SUSTAINABLE CITIES AND COMMUNITIES

Objectives: 11.1 11.4

Goal 12: RATIONAL CONSUMPTION AND PRODUCTION PATTERNS

Objectives: 12.5 12.6 12.7

Goal 15: TERRESTRIAL ECOSYSTEMS

Objectives: 15.5
Partnering with the Graduate School of Management at St. Petersburg State University (GSOM SPbSU);

VTB’s system of internships and grants for gifted students;

Financial literacy and skills development programmes.

- Responsible investing;
- Financing green industries;
- Funding for energy efficiency projects;
- Making environmental claims in project financing;
- Environmental initiatives for retail customers.

Financing socially important industries:

- Housing construction;
- Transport infrastructure;
- Healthcare;
- Agriculture.

Modernisation and innovation in the banking sector:

- Implementation of the target technology layer of a single omni-channel platform for customers;
- Implementation of robotised solutions and machine learning technologies in digital services;
- Creation of a retail loan pipeline.

- Active participation in the implementation of government programmes to support small and medium businesses;
- Special conditions for financing small and medium businesses;
- Development of special financial services for small and medium businesses in order to make it easier for them to operate;
- Restructuring of deals for large employers.

Objective 4.4

Substantially increase the number of youth and adults with marketable skills for employment, decent jobs, and entrepreneurship.

- Partnering with the Graduate School of Management at St. Petersburg State University (GSOM SPbSU);
- VTB’s system of internships and grants for gifted students;
- Financial literacy and skills development programmes.

Objective 8.2

Achieve higher economic productivity through diversification, technical modernisation and innovative activities.

Financing socially important industries:

- Housing construction;
- Transport infrastructure;
- Healthcare;
- Agriculture.

Modernisation and innovation in the banking sector:

- Implementation of the target technology layer of a single omni-channel platform for customers;
- Implementation of robotised solutions and machine learning technologies in digital services;
- Creation of a retail loan pipeline.

- Active participation in the implementation of government programmes to support small and medium businesses;
- Special conditions for financing small and medium businesses;
- Development of special financial services for small and medium businesses in order to make it easier for them to operate;
- Restructuring of deals for large employers.

Objective 8.3

Facilitate development-oriented policies that promote productive activities, decent jobs, entrepreneurship, creativity, and innovative activities, and encourage formal recognition and development of micro, small, and medium enterprises, including by providing them access to financial services.

Objective 8.4

Ensure that economic growth is not accompanied by environmental degradation.

- Responsible investing;
- Financing green industries;
- Funding for energy efficiency projects;
- Making environmental claims in project financing;
- Environmental initiatives for retail customers.

- Programs for gender equality and inclusion in the workplace;
- Working with students and young professionals;
- Ensuring decent working conditions and social benefits for employees in all regions of operation.

Objective 8.5

Ensure full and productive employment and decent work for all women and men, including young people and people with disabilities, and equal pay for work of equal value.

- Programs for gender equality and inclusion in the workplace;
- Working with students and young professionals;
- Ensuring decent working conditions and social benefits for employees in all regions of operation.

- Territorial accessibility of financial services and digitalisation of banking processes;
- Making financial services accessible to people with health limitations;
- Financial literacy programmes for the population;
- Specialised products and services for socially vulnerable categories of population.

Objective 8.10

Strengthen the ability of national financial institutions to promote and expand access to banking, insurance and financial services for all.

- Programs for gender equality and inclusion in the workplace;
- Working with students and young professionals;
- Ensuring decent working conditions and social benefits for employees in all regions of operation.

- Territorial accessibility of financial services and digitalisation of banking processes;
- Making financial services accessible to people with health limitations;
- Financial literacy programmes for the population;
- Specialised products and services for socially vulnerable categories of population.

- Programs for gender equality and inclusion in the workplace;
- Working with students and young professionals;
- Ensuring decent working conditions and social benefits for employees in all regions of operation.

- Territorial accessibility of financial services and digitalisation of banking processes;
- Making financial services accessible to people with health limitations;
- Financial literacy programmes for the population;
- Specialised products and services for socially vulnerable categories of population.

- Programs for gender equality and inclusion in the workplace;
- Working with students and young professionals;
- Ensuring decent working conditions and social benefits for employees in all regions of operation.

- Territorial accessibility of financial services and digitalisation of banking processes;
- Making financial services accessible to people with health limitations;
- Financial literacy programmes for the population;
- Specialised products and services for socially vulnerable categories of population.

- Programs for gender equality and inclusion in the workplace;
- Working with students and young professionals;
- Ensuring decent working conditions and social benefits for employees in all regions of operation.

- Territorial accessibility of financial services and digitalisation of banking processes;
- Making financial services accessible to people with health limitations;
- Financial literacy programmes for the population;
- Specialised products and services for socially vulnerable categories of population.

- Programs for gender equality and inclusion in the workplace;
- Working with students and young professionals;
- Ensuring decent working conditions and social benefits for employees in all regions of operation.

- Territorial accessibility of financial services and digitalisation of banking processes;
- Making financial services accessible to people with health limitations;
- Financial literacy programmes for the population;
- Specialised products and services for socially vulnerable categories of population.

- Programs for gender equality and inclusion in the workplace;
- Working with students and young professionals;
- Ensuring decent working conditions and social benefits for employees in all regions of operation.

- Territorial accessibility of financial services and digitalisation of banking processes;
- Making financial services accessible to people with health limitations;
- Financial literacy programmes for the population;
- Specialised products and services for socially vulnerable categories of population.
Goal 9: INDUSTRY, INNOVATION, AND INFRASTRUCTURE

Objective 9.1
Develop qualitative, reliable, sustainable and resilient infrastructure to support economic development and people's well-being, with a focus on affordable and equitable access for all.

- Financing socially important infrastructure development projects (transport, energy supply, information and communication technologies) in the regions of operation;
- Developing and implementing support for innovation in the financial sector, digitalisation of business;
- Including VTB Group in the list of the founders of Data Economy ANO.

Objective 9.3
Increase access of small industrial and other enterprises to financial services, including low-cost loans, and strengthen their integration into value chains and markets

- Specialised products and services for small and medium businesses;
- Facilitate a state support programme for small and medium businesses.

Objective 9.4
Upgrade infrastructure and re-equip industrial establishments, making them sustainable through increased resource efficiency and the increased use of clean and environmentally friendly technologies.

- Financing projects that increase the energy efficiency of production;
- Financing the construction of renewable energy sources;
- Supervising the implementation of environmental projects in the Arctic zone of the Russian Federation;
- Making environmental claims when financing major infrastructure projects.

Objective 9.10
Enhance efforts to protect and preserve the world's cultural and natural heritage

- Large-scale target programme: Patriotism and a Country of Traditions

Goal 10: SUSTAINABLE CITIES AND COMMUNITIES

Objective 10.1
Ensure universal access to adequate, safe and affordable housing and basic services

- Implementing a paperless document flow system, drastically reduce consumption of paper media;
- Optimising waste management.

Objective 10.3
Apply sustainable production practices and report information about far-sighted use of resources

- Reducing our own environmental footprint: reducing resource consumption, introducing energy-saving technologies;
- Reporting according to the GRI standard and independent certification of a number of environmental indicators.

Objective 10.4
Restrain the degradation of natural habitats, halt biodiversity loss, ensure conservation and prevent extinction of endangered species

- Participating in the Ecology National Project;
- Functioning as the Russian Executive Agency for the Arctic Council Project Support Instrument for Arctic nature conservation;
- Financial support for the World Wildlife Fund (WWF) programme for the conservation of rare species of big cats and the Amur Tiger Centre;
- Green financing;
- Environmental initiatives for VTB’s retail customers.

Objective 11: RATIONAL CONSUMPTION AND PRODUCTION PATTERNS

Objective 11.1
Significantly reduce the volume of waste through prevention, reduction, recycling and reuse measures

- Implementing a paperless document flow system, drastically reduce consumption of paper media;
- Optimising waste management.

Objective 11.4
Promote sustainable public procurement practices in line with national strategies and priorities

- Taking a responsible approach to procurement;
- Anti-corruption programmes and compliance system.

Objective 12: SUSTAINABLE PRODUCTION PATTERNS

Objective 12.5
Apply sustainable production practices and report information about far-sighted use of resources

- Reducing our own environmental footprint: reducing resource consumption, introducing energy-saving technologies;
- Reporting according to the GRI standard and independent certification of a number of environmental indicators.

Objective 12.6
Participate in the Ecology National Project; Function as the Russian Executive Agency for the Arctic Council Project Support Instrument for Arctic nature conservation;

- Financial support for the World Wildlife Fund (WWF) programme for the conservation of rare species of big cats and the Amur Tiger Centre;
- Green financing;
- Environmental initiatives for VTB’s retail customers.

Goal 13: LIFE ON LAND

Objective 13.1
Significantly reduce the volume of waste through prevention, reduction, recycling and reuse measures

- Implementing a paperless document flow system, drastically reduce consumption of paper media;
- Optimising waste management.

Objective 13.4
Promote sustainable public procurement practices in line with national strategies and priorities

- Taking a responsible approach to procurement;
- Anti-corruption programmes and compliance system.

Goal 14: LIFE IN OCEANS AND UNDERWATER MUNDO

Objective 14.3
Apply sustainable production practices and report information about far-sighted use of resources

- Reducing our own environmental footprint: reducing resource consumption, introducing energy-saving technologies;
- Reporting according to the GRI standard and independent certification of a number of environmental indicators.

Objective 14.6
Participate in the Ecology National Project; Function as the Russian Executive Agency for the Arctic Council Project Support Instrument for Arctic nature conservation;

- Financial support for the World Wildlife Fund (WWF) programme for the conservation of rare species of big cats and the Amur Tiger Centre;
- Green financing;
- Environmental initiatives for VTB’s retail customers.

Goal 15: TERRITORIAL ECOLOGICAL SYSTEMS

Objective 15.1
Significantly reduce the volume of waste through prevention, reduction, recycling and reuse measures

- Implementing a paperless document flow system, drastically reduce consumption of paper media;
- Optimising waste management.

Objective 15.4
Promote sustainable public procurement practices in line with national strategies and priorities

- Taking a responsible approach to procurement;
- Anti-corruption programmes and compliance system.

Objective 15.7
Participate in the Ecology National Project; Function as the Russian Executive Agency for the Arctic Council Project Support Instrument for Arctic nature conservation;

- Financial support for the World Wildlife Fund (WWF) programme for the conservation of rare species of big cats and the Amur Tiger Centre;
- Green financing;
- Environmental initiatives for VTB’s retail customers.
VTB constantly improves its stakeholders’ involvement, including minority shareholders, in the management of the Bank. A new ESG strategy is being developed with their participation, which will supplement VTB’s business strategy in mid-2021.
Approach to the Sustainability Management

Functional divisions and governing bodies at both the Group and Bank levels are involved in the process of managing the sustainability aspects of VTB’s activities.

Key aspects of sustainability are handled by the Bank’s senior management - the Supervisory Council and its committees. In terms of operational management of these aspects, the committees under the Management Board, key specialised departments and services of the Bank are involved in the process.

Management of sustainability aspects in the Group is regulated by the Policy on Corporate Social Responsibility, which defines the principles and areas of activity in the field of sustainable development. The policy applies to all divisions of VTB Bank and covers issues related to managing the bank’s corporate behaviour and the bank’s influence on the corporates, market, social, and natural environment.

Vladimir Levykin
Head of Strategy and Corporate Development, Senior Vice President, VTB Bank

In addition to its financial efficiency goals, the VTB Group aims to ensure that sustainability principles are applied broadly and evenly across all areas of its business. We have already made significant progress in implementing individual sustainability initiatives and are now moving towards a phase of integrated management of all aspects of sustainability and systematic monitoring of the results.

VTB's strategic vision for sustainable development

In addition to continuing to integrate sustainability principles into the Group’s overall business strategy, VTB also began work on developing the VTB Sustainability Strategy, which will set out the main areas for responsible banking at VTB and outline our sustainability targets.

The current VTB Group Strategy, developed for the period up to 2022, partly reflects the principles of responsible business practices, incorporation of environmental, social and governance factors (ESG factors) into decision-making processes. For a more complete implementation of ESG factors in the Bank’s activities, it was decided to develop a separate profile document.

The new ESG strategy will be adopted in mid-2021 and will provide for the following priority areas: responsible financing, including advising customers on improving the ESG characteristics of their business; customer involvement in ESG projects and initiatives; investment in socially important projects; sponsorship and charity; organisational development, as well as the creation of an ESG management model, including management of relevant risks.

Significant attention will be paid to green financing and responsible investing - lending for environmental projects, energy service factoring, green bonds issue, as well as creation of new green instruments.

In addition, the issues of reducing our own ecological footprint, reducing and improving the structure of energy consumption, the transition to a paperless document flow will be considered.

A separate area of the new Strategy will be the implementation of projects in the field of social infrastructure, including the implementation of concessional mortgage lending programmes, housing construction and transport infrastructure, the development of social services.

A provision is also made to include clear benchmarks in the Strategy, by which it will be possible to judge the success of implementation of the Strategy.
Corporate Governance

VTB has built an effective corporate governance system that ensures the transparency of management decision-making and is aimed at achieving our long-term objective of embedding responsible banking principles into all aspects of the Group’s business.

VTB’s corporate governance system goals

1. Enforcing shareholder and investor rights
2. Improving the investment appeal and transparency of the Bank’s operations
3. Creating effective mechanisms for assessing risks that might affect the value of the Bank
4. Ensuring that funds provided by shareholders (investors) are used effectively

Structure of VTB Bank’s (PJSC) corporate governance bodies

- General Meeting of Shareholders
  - Elects
  - Prepares Recommendations and Reports
- Supervisory Council
  - 11 members
  - Including four representatives of minority shareholders
  - Dmitry Grigorenko
- Strategy and Corporate Governance Committee
  - Prepares Recommendations and Reports
- Statutory Audit Commission
  - Prepares Recommendations and Reports
- Audit Committee
  - Prepares Recommendations and Reports
- Head of Internal Audit Department
  - Prepares Recommendations and Reports
- President and Chairman of the Management Board
  - 12 members
  - Andrey Kostin
    - President, Chairman of the Management Board

VTB’s CORPORATE GOVERNANCE SYSTEM IS BASED ON THE BEST RUSSIAN AND INTERNATIONAL PRACTICES AND IS CONSTANTLY BEING IMPROVED TAKING INTO ACCOUNT THE NEEDS OF SHAREHOLDERS AND OTHER STAKEHOLDERS, ENSURING A CONSISTENT APPROACH TO MANAGING THE GROUP’S SUSTAINABLE DEVELOPMENT.

General Meeting of Shareholders

The General Shareholders Meeting is the supreme governing body of VTB Bank. Any shareholder with ordinary shares may exercise his/her right to participate in the management of the Bank by voting on issues on the agenda of the General Meeting of Shareholders.

The General Meeting of Shareholders reviews and approves the Annual Report. At the same time, shareholders are involved in shaping the content of the Group’s Sustainability Report, which details the economic, environmental and social impacts, risks and opportunities.

The Bank and its minority shareholders have established the Shareholders’ Consultative Council, an independent expert and advisory body comprised of minority shareholders, whose meetings are attended by members of the Supervisory Council and the Bank’s executive bodies. Members of the Shareholders’ Consultative Council participate in VTB Bank’s activities by discussing the most pressing and important issues affecting the interests of shareholders, including the sustainable development of the VTB Group, the development and implementation of the Group’s strategy and the improvement of corporate governance practices.
The Bank's Supervisory Council, elected by and accountable to the shareholders, provides strategic management and control over the activities of the executive bodies: the President - Chairman of the Management Board and the Management Board.

The Supervisory Council approves the Group's Strategy and Long-Term Development Programme, including sustainable development issues, policy for remuneration and reimbursement of executive bodies and other key executives, plays a key role in significant corporate events. An important function of the Supervisory Council is to ensure that the Group’s risk management and internal control system works as a whole.

At the Annual General Meeting of Shareholders held on 24 September 2020, a new composition of the Bank's Supervisory Council was elected. The Bank believes that the current composition of the Supervisory Council is as independent as possible in its activities, which allows it to represent the interests of a wide range of shareholders.

The Audit Committee and the HR and Remuneration Committee formed in 2020 under the Bank’s Supervisory Council consist exclusively of independent directors.

The following Committees are established and actively operate under the Supervisory Council:

- The HR and Remuneration Committee, which prepares recommendations on the key issues of appointments and motivation of the members of the Supervisory Council, executive bodies and control bodies;
- The Audit Committee, whose main activities are the analysis and maintenance of an effective and adequate internal control system;
- Strategy and Corporate Governance Committee, which reviews and prepares recommendations on issues of strategic development, including sustainable development, improvement of corporate governance quality and enhancement of the Bank's equity management.

The new members of the Bank's Supervisory Council include:

- 3 independent directors
- 4 representatives of minority shareholders
- 5 directors who are not related to the major shareholder

Sustainability-related matters reviewed by the Bank's Supervisory Council in 2020

1. Assessment of the implementation of VTB Bank's Long-Term Development Programme and the fulfilment of key performance indicators.
2. Approval of a new version of the VTB Bank Code of Ethics.
6. Approval of the plan for countering the negative consequences of the COVID-19 epidemic, including measures to protect VTB Bank employees from the spread of coronavirus infection and to ensure the stability of their work.
7. Consideration of the report on the results of implementation in 2019 of the Internal Control Rules to prevent money laundering, terrorist financing and the financing of proliferation of weapons of mass destruction (AML/CFT and FPWMD) and recommended measures to improve the AML/CFT and FPWMD system.
Management Board

The executive bodies, the President - Chairman of the Management Board and the Management Board, carry out day-to-day management and implement the tasks assigned to them by the shareholders and the Supervisory Council. Among other things, they are responsible for implementing the management decisions of the Supervisory Council in the economic, environmental and social sector.

The Management Board has a number of standing collegial working bodies, commissions and committees involved in making management decisions on sustainable development issues. These Committees and commissions report to the executive bodies of the Bank - the Management Board and the President - Chairman of the Management Board.

Statutory Audit Commission

Monitoring over the financial and economic activities of the Bank is carried out by the Statutory Audit Commission, as well as the Internal Audit Department - an independent structural division accountable to the Supervisory Council. The Department monitors and evaluates the efficiency of the Bank's internal control system, management of banking risks, verifies the accuracy, completeness, objectivity and timeliness of accounting and management reporting. It also forms unified approaches to the organisation of internal control systems in companies under the Bank's control, collects information on their condition and develops recommendations for their improvement.

The Supervisory Council approves the work plans of the Internal Audit Department and monitors their implementation. The composition of the Statutory Audit Committee is approved by the Bank's General Shareholders Meeting. Among other things, since 2014, it includes a representative of minority shareholders.

Key committees of the VTB Bank Management Board responsible for managing sustainability aspects

- Retail Business Development Committee;
- Medium and Small Business Development Committee;
- Loan Committee;
- Operational and Compliance Risk Management Committee;
- Commissions for Procurement of Goods, Works and Services;
- Personnel Committee;
- Sponsorship and Charity Committee.

Raising the position in the National Corporate Governance Rating to Level 8

Based on annual independent monitoring results, the Russian Institute of Directors raised VTB Bank's National Corporate Governance Rating to Level 8 in 2020, which corresponds to the Best Corporate Governance Practices indicator.

Over the past year, experts saw a number of qualitative changes in the Bank's corporate governance system. Thus, at the 24 September 2020 Annual General Meeting of Shareholders, a new composition of the Bank's Supervisory Council was elected, which included five directors who were not related to the major shareholder. At the same time, three of the five directors are independent and four are representatives of minority shareholders. Shareholders also elected a new Statutory Audit Commission, which included Vadim Soskov, a representative of minority shareholders.

The rating of “8” is assigned to a company which, in the opinion of experts, complies with the requirements of Russian corporate governance legislation, follows an essential part of the Corporate Governance Code and is characterised by insignificant risks of owners' losses related to the quality of corporate governance.

Positive changes in the corporate governance system:

- Consideration by the Bank's Supervisory Council of the results of the external evaluation of the Supervisory Council's performance, which was conducted for the first time with the involvement of an independent consultant;
- Approval of a new version of the VTB Code of Ethics, which, among other things, contains new provisions on comprehensive regulation of conflicts of interests of the Bank's employees and members of the Supervisory Council;
- The Audit Committee and the HR and Remuneration Committee under the Bank Supervisory Council are comprised exclusively of independent directors.

The Bank's Public Rating by the Russian Institute of Directors is 2020 reached the second highest level of 8.0, which is evidence of the recognition of the company's corporate governance practices.
Sustainability Risk Management

VTB Group risks, including those related to sustainable development, are managed on the basis of unified standards developed and adopted by the Bank. These standards regulate procedures for identifying, assessing and monitoring risks, controlling their volume, structure and concentration, developing effective measures to optimise and mitigate risks and preparing regular risk reports.

The VTB Group defines sustainability risks as:

- ESG risks;
- Strategic risk;
- Information security risks.

ESG Risks

As part of our commitment to sustainable development and consideration of complex risk relationships, the Bank focuses on ESG risks associated with such factors as environmental, social and governance aspects. They also affect the value of the company, are taken into account in responsible investment and are implemented within the scope of the risks identified in the Bank.

ESG risks are managed comprehensively in terms of the following types of risks: credit, reputational, operational and concentration risks.

Physical risk is determined by the Bank mainly as part of operational risk analysis. Additionally, scenario-based analysis may also be performed, including assessment of the consequences of potential unfavourable conditions, and self-assessment of actually incurred loss due to operational risk, including in connection with emergency situations. In addition, risks associated with the occurrence of emergency situations are analysed when assessing the pledged property.

The transitional risk is assessed by the Bank within the scope of credit risk when considering the possibility of issuing a loan and assigning a credit rating to a borrower. In the industry analysis, the Bank considers political, legal and technological changes in the industry, and therefore provides additional assessment of the transitional risk.

In assessing the credit risk premium, consideration is given to the borrower’s credit rating, which in turn includes an assessment of the likelihood of losses from investment risks of transitional risk, as well as physical risk.

Strategic risk

Strategic risk is the risk of an unfavorable change in the results of the Bank’s activities due to erroneous decisions made in the course of the Bank’s management, including the design, approval and implementation of the Bank’s development strategy, improper execution of decisions made, as well as the Bank’s inability to take into account changes in external factors.

The Bank considers changes in socio-economic and demographic processes, segmentation of the banking services market and supply and demand trends, the Bank’s competitive position in selected market segments, as well as the influence of third parties to be external factors conditioning the strategic risk.

The applied methods of strategic risk management in the Bank include strategic and business planning, monitoring over the fulfillment of the approved plans, as well as analysis of changes in the market environment.

In order to maintain strategic risk at an acceptable level, the Bank provides for:

- monitoring and controlling the achievement of the Bank’s goals and targets;
- monitoring of external environment conditions (including macroeconomics, changes in customer segments, market demand for banking products, competitive environment and the Bank’s internal environment);
- monitoring the overall level of strategic risk on the basis of the developed evaluation methodology.

Information security risk

Information security risk is a type of operational risk. It represents the risk of the implementation of information security threats, which are caused by deficiencies in information security processes, including technological and other measures, application software deficiencies in automated systems and applications, as well as the non-compliance of these processes with the Bank’s activities.

The operational risk management system of VTB Bank is aimed at minimising the cases of information security risk, including reducing the probability of violations of business processes, personnel errors, deliberate actions of personnel or third parties against the Bank and its customers, system and equipment failures, violation of rights of customers and counterparties, as well as limiting the amount of losses from its realisation.
Compliance Control

One of the important tasks of the Bank is to have an effective system of elements and mechanisms for preventing money laundering, terrorist financing and the financing of proliferation of weapons of mass destruction (AML/CFT and FPWMD) and for managing regulatory (compliance) risks.

In order to comply with legal requirements and to organise processes and procedures for compliance risk management, AML/CFT and FPWMD, the Bank has established and operates the Compliance Control and Financial Monitoring Department, which operates in accordance with the Regulation approved by the Management Board of VTB Bank.

The divisions within its structure ensure compliance with the current AML/CFT and FPWMD laws and the Bank’s regulations in these areas, as well as assist the Bank’s divisions in performing their business conduct and support tasks with regard to compliance with regulatory requirements in such areas as compliance risk management, combating insider information misuse and market manipulation, managing conflicts of interest, and combating corruption.

As part of the implementation of the Bank’s strategic goals to create a first-choice financial institution, the approach to a number of AML/CFT and FPWMD requirements was revised, significantly advancing financial monitoring and compliance towards digitalisation and implementation of automated solutions.

Repeated restrictions and stay-at-home order introduced in the reporting period served as factors that pushed the process of digitalisation of banking services and prioritised their transition to the online mode. Re-engineering of processes towards automation made it possible to almost completely transfer interaction with customers into remote communication channels and shape the customer experience.

VTB Bank monitors compliance with business ethics and anti-corruption requirements on a regular basis. The Bank has a multi-channel system for receiving employee reports of violations and abuses, including those related to conflicts of interest, corruption and business ethics. Information is analysed, causes are identified, and recommendations are developed for subdivisions on how to resolve situations that have arisen and prevent their occurrence in the future.

In 2020, the Russian Union of Industrialists and Entrepreneurs awarded VTB Bank the highest possible rating grade, A1, based on the results of the first national Anti-Corruption Rating of Russian Business. This class is assigned to companies with the highest level of anti-corruption management and the lowest level of risk of corruption and related threats to investors, creditors, business partners and other stakeholders.

The purpose of the rating is to increase the openness and transparency of Russian business by publishing the level of compliance of companies’ activities with the provisions of the Anti-Corruption Charter of Russian Business and the international standard ISO 37001:2016 “Anti-bribery Management Systems — Requirements with Guidance for Use”. The rating makes it possible to see to what extent the country’s largest companies are ready to effectively use and publicly disclose their anti-corruption management systems.

According to the Rating Committee, VTB Bank’s leadership in anti-corruption compliance in the Russian Federation is based on the developed system of internal anti-corruption control acts, as well as their use with a high level of automation/digitalisation of the results of such controls.

ONE OF VTB’S PRIORITIES IS TO ENSURE A BALANCE BETWEEN UNCONDITIONAL COMPLIANCE WITH LEGISLATION AND CUSTOMER SATISFACTION.
Business Ethics and Anti-Corruption

Maintaining high standards of business ethics and transparency and preventing and combating corruption are integral parts of the VTB Group’s corporate culture.

The Bank has a Code of Ethics and Anti-Corruption Policy, which establishes ethical standards of operation and provides for the principles and rules of business conduct and ethics mandatory for all employees and members of the Supervisory Council, including the prevention of corruption in the performance of official duties.

Adherence to the Bank’s Code of Ethics is mandatory and unconditional for all employees. In cases where the ethical standards and principles set out in the Code of Ethics are higher than those defined by business practice and applicable law, the Bank observes the standards and principles of the Code of Ethics.

VTB also participates in anti-corruption partnerships. In particular, in 2020, projects were implemented jointly with the Anti-Corruption Centre of the Higher School of Economics to develop a regulatory framework for combating corruption, including the creation of e-courses on foreign anti-corruption legislation applicable to Russian organisations and the creation of a database of court practice on the application of liability for corruption offences.

Also with the support of VTB, the Institute of Legislation and Comparative Law under the Government of the Russian Federation has held a number of scientific, practical and educational events aimed at creating an atmosphere of intolerance to corrupt practices in society and increasing the effectiveness of anti-corruption education.

Internal control and business ethics training of personnel

In order to maintain the highest ethical standards of VTB Group operations, mandatory training has been arranged for all employees.

All newly hired employees are obligated to familiarise themselves with the internal regulations that stipulate principles and standards of ethical conduct and terms of employment with the Bank or any other company of the VTB Group. Employee adaptation includes required introductory training courses that explain the Code of Ethics to all categories of new employees. Training programmes are available as remote learning sessions on the Bank’s employee education portal and on VTB Group companies’ internal corporate platforms.

System for receiving employees’ reports on violations and abuses

The Bank has a multi-channel system for receiving employee reports of violations and abuses, including those related to conflicts of interest, corruption and business ethics. Responsible functional areas of the Bank regularly analyse information, identify causes and make recommendations on how to resolve the situations that have arisen and prevent their occurrence in the future.

Part of this system is the Whistleblower hotline where employees can address issues of violations of Russian law and the Bank’s regulatory and organisational and administrative documents, including reporting cases of corruption.

Responsible procurement approach

VTB adheres to a responsible approach to procurement and consistently works to create a transparent and efficient procurement infrastructure and improve cooperation with suppliers.

VTB Bank’s procurement activities are aimed at ensuring that the Bank’s needs for high-quality products are met in a timely and complete manner, subject to the following conditions:

- Procurement transparency;
- Efficient use of funds;
- Expanding the opportunities for legal entities and individuals, including small and medium businesses, to participate in procurement;
- Development of fair competition.

The Bank is guided by basic procurement activity principles and ensures the transparency of procurement processes, equal rights, non-discrimination and the absence of unjustified restrictions on competition towards participants. VTB adheres to the principle of targeted and cost-effective spending of funds and does not limit access to procurement opportunities by setting biased requirements for participants.
In order to improve the digitalisation of our procurement processes, in 2020 VTB introduced electronic document management between the Bank and its counterparties, launched iProc, a new electronic procurement management system, and introduced new tools for managing the procurement function. The annual volume of procurements from small and medium enterprises was 40% (with the statutory standard of 20%). The annual volume of procurements, participants of which may only be small and medium enterprises, amounted to 27% (with the statutory standard of 18%).

An important achievement of 2020 was the greater access of small and medium enterprises to the Bank’s procurement activities. The total volume of orders placed among them amounted to RUB 33.6 billion. At the same time, the annual volume of procurements from small and medium enterprises was 40% (with the statutory standard of 20%). The annual volume of procurements, participants of which may only be small and medium enterprises, amounted to 27% (with the statutory standard of 18%).

Low-volume procurements in 2020 were transferred to the Corporate Online Store on the VTB Business Connect platform. On the one hand, this approach ensures increased competitiveness of potential suppliers, as well as provides an opportunity for objective assessment of the existing quotation market and analysis of information on fulfillment of obligations by suppliers from VTB.

On the other hand, it is an effective online platform that promotes fair competition and provides opportunities for small businesses to become reliable suppliers to VTB. A total of 2,820 procurements totalling RUB 0.7 billion were made through the VTB Business Connect Corporate Online Store in 2020.

Increasing the share of small and medium enterprises in total procurement

An important achievement of 2020 was the greater access of small and medium enterprises to the Bank’s procurement activities. The total volume of orders placed among them amounted to RUB 33.6 billion. At the same time, the annual volume of procurements from small and medium enterprises was 40% (with the statutory standard of 20%). The annual volume of procurements, participants of which may only be small and medium enterprises, amounted to 27% (with the statutory standard of 18%).

Low-volume procurements in 2020 were transferred to the Corporate Online Store on the VTB Business Connect platform. On the one hand, this approach ensures increased competitiveness of potential suppliers, as well as provides an opportunity for objective assessment of the existing quotation market and analysis of information on fulfillment of obligations by suppliers from VTB.

On the other hand, it is an effective online platform that promotes fair competition and provides opportunities for small businesses to become reliable suppliers to VTB. A total of 2,820 procurements totalling RUB 0.7 billion were made through the VTB Business Connect Corporate Online Store in 2020.

Key areas for the development of responsible purchasing at VTB Bank

- Implementation of the optimal model and efficient tools for managing the procurement function
- Continuous improvement of procurement processes
- Digitalisation of the procurement management process
- Support for small and medium entrepreneurships
- Implementation of an import substitution programme

Stakeholder Engagement

The trust of our stakeholders is a key element of the successful implementation of the Group’s strategic objectives. The VTB Group’s stakeholder engagement activities rely on the principles of fairness, due diligence, professional competence, mutual trust and respect, focus on clients’ interests, and inviolability of obligations.

Shareholders

In 2020, the number of VTB shareholders more than doubled from 159 thousand to 337 thousand. As of December 2020, VTB had 336 thousand private investors living in 85 regions of Russia. In 2020, the shareholder structure continued to be rejuvenated, with 79% of our shareholders under the age of 50.

VTB continued to implement a comprehensive shareholder and investment community engagement programme aimed at improving the investment appeal of VTB shares and increasing the Bank’s market capitalisation.

The Shareholder Relations Service is the main body responsible for relations with all individual shareholders. VTB implements a number of significant projects and measures to ensure effective shareholder engagement, encourage feedback and improve financial literacy among minority shareholders.

The Bank has an effective system for minority shareholder engagement. A VTB shareholder can contact the Bank through a broad range of channels, including online on the Bank’s website and social networks, by email, through the Shareholder Relations Service and Call Centre, using a mobile application and through Shareholder Relations Centres.

VTB’s comprehensive communications system includes a broad range of forms and tools for stakeholder engagement, as well as feedback mechanisms, which help identify the most significant issues in a timely manner and effectively manage our own impact.

VTB SHAREHOLDING PATTERN, %

- Common shares in free float: 47.2%
- Common shares (held by Federal Agency for State Property Management): 33.2%
- Type 1 preference shares (held by Ministry of Finance of the Russian Federation): 39.1%
- Type 2 preference shares (held by State Corporation Deposit Insurance Agency): 7.8%
- Federal Agency for State Property Management: 7.8%
- Institutional investors: 7.8%
- Retail investors: 3.9%

private investors from 85 regions of the Russian Federation

of shareholders are under 50
The COVID-19 pandemic made significant adjustments to VTB Bank's plans for holding shareholder events. Scheduled in-person events were transformed into an online format and remote communication channels were used on a broader scale. In order to ensure the safety of VTB shareholders and employees, the Shareholder Relations Centres were temporarily closed to receive visitors in person in April 2020. As a result, one of the key objectives in the development of communications was to improve existing electronic channels and offer new opportunities for shareholders.

**Impact of the COVID-19 pandemic on shareholder engagement processes**

The following initiatives were implemented in 2020:
- The functionality of the VTB Shareholder mobile application was significantly enhanced;
- The Shareholder and Investor Relations section of the VTB Bank website was updated;
- Communication with shareholders via social networks was improved;
- A new interactive online format for shareholder information delivery was developed - the Shareholder Guide;
- We created the I Am a VTB Shareholder community on the Bank's intranet portal for VTB employees;
- Four online training programmes were launched.

**Shareholders’ Consultative Council**

The Shareholders’ Consultative Council is a unique advisory body for improving relations between VTB and its minority shareholders. The Shareholders’ Consultative Council’s main objective is to represent the interests of minority shareholders and to communicate their position to the Bank’s top management. The Shareholders’ Consultative Council regularly suggests new ways of improving the quality of service and participates in discussions of strategically important issues, including dividend payments and the Group's development strategy. Members of the Management Board and Supervisory Council, heads of the Bank's departments and functional areas, as well as subsidiaries, participate in meetings of the Council.

**RESULTS**

- **Meeting of the Shareholders’ Consultative Council**
  - 1 meeting in person
  - 3 meetings in online format
- **Online conferences with representatives of the Shareholders’ Consultative Council and VTB top management**
  - 4 conferences
  - >18 thousand participants
- **Online interaction**
  - 2.5 thousand subscribers on social networks
  - ~40 thousand installations of the VTB Shareholder mobile app
  - 1 million views of the Shareholder and Investor Relations section of the Bank’s website
- **Special offers and benefits programme for holders of the Bank’s shares**
  - >290 thousand shareholders buy the Bank’s retail products
- **Shareholder events**
  - >50 thousand participants of online training events for shareholders
  - 766 participants of in-person events for shareholders in 2020
- **Annual General Meeting of Shareholders**
  - 4.2 thousand participants
Investors
VTB strives to keep the investment and analytical community informed of the VTB Group's operational and financial performance in a timely manner and as promptly as possible. VTB works to diversify its institutional investor base and maintain contacts with portfolio managers of investment funds holding the Bank’s shares and bonds and with potential investors in VTB. We constantly strive to increase the level of information transparency and regularly inform representatives of the investment and financial community on all issues of interest through various channels, as well as to promptly respond to incoming requests.

The most important element of interaction with the investment and analytical community is the provision of high-quality and prompt feedback. Based on the requests received, the level of information disclosure in financial statements, annual reports, sustainability reports and on the corporate website is constantly improved.

Affected by the COVID-19 pandemic, the format of communication with institutional investors and analysts was changed and all events were transferred to the online format: 157 online meetings were held (of which 96 were held as part of online conferences and road shows).

Also during the reporting period, an independent survey was conducted on VTB’s perception by the investment and analytical community, to identify its strengths and strategic objectives for the Group’s development from the perspective of market participants. Largest international investment funds took part in the survey. The questions were about VTB Group’s operating and financial performance, market position, strategic priorities and development objectives.

Customers
Among VTB’s customers are dozens of thousands of large companies, small and medium businesses, operating in various industries and millions of individuals, including customers from VTB’s retail business.

VTB sticks a responsible approach to customer relations and observes the principles of business ethics and fair marketing. The Bank takes all necessary measures to prevent fraudulent sales and the misrepresentation of customers. In order to effectively support customers on all issues that arise, feedback is analysed to determine the most pressing issues and conduct customer satisfaction surveys.

In interacting with customers, VTB offers innovative solutions and products and services individually tailored to each customer group, and strives to ensure the highest level of service for everyone.

For more information on customer support during the COVID-19 pandemic, see p. 13.

**Results**
- **Customer satisfaction surveys**
  - (online and telephone surveys)
  - 85% of customer ratings come out as 4-5 on a five point scale
  - 58 million enquiries to the contact centre

- **Channels for remote banking services, including VTB Online mobile application and online banking**
  - 100% of customer enquiries were processed
  - 10.1 million users of VTB Online application

- **Information support in social media accounts and mobile applications**
  - 203 thousand followers Facebook
  - 130 thousand followers Vkontakte

- **VTB Call Centre**

---

**There was a record increase in the number of participants in the IFRS quarterly disclosure conference calls, with a 64% increase in the number of participants compared to 2019.**

**The bank has built an effective system for improving the quality of customer service, allowing it to maintain a high level of customer loyalty year after year.**
Scopes of cooperation between VTB and Russian regions

**Scopes of cooperation between VTB and Russian regions**

**Development of regions’ social and economic potential**

- Implementation of cutting-edge banking technologies and increasing the availability of financial services

**Development of bank card service infrastructure**

- Industrial complex modernisation

- Facilitation of investment in the regions

- Development of a credit system

- Development of housing construction

**In 2020, VTB Capital arranged more than 30 bond placements for constituent entities and municipalities for a total amount of over RUB 300 billion. This financing of the budgets of the constituent entities allowed the issuers to fully implement all social functions assigned to the respective budgets. A number of issuers, such as Sverdlovsk, Ulyanovsk, Novosibirsk regions, were included in the top-10 ESG-rating of Russian regions, compiled by the RAEX-Analytics rating agency on the Governance (Management quality) criterion. The leaders in the Environmental criterion according to the same rating - St. Petersburg and the Moscow region - allocated significant funds for the development of environmental programmes of the respective regions, including the development of environmentally safe transport.**
Employees

By building effective and trusting relationships with employees, VTB creates opportunities for professional and personal growth and provides a competitive compensation package and safeguards occupational health and safety.

The Group pays significant attention to creating a positive corporate culture, which is in line with the Group’s values and helps its employees achieve their full potential.

Other important areas of interaction with employees include ensuring equal opportunities for career growth and professional development, providing social benefits and occupational health and safety.

Business partners

The VTB Group develops long-term mutually beneficial relationships with its business partners on the basis of the principles of equality, fairness, non-discrimination, prevention of corruption and transparency.

This category of stakeholders includes suppliers and contractors and companies of various shapes and sizes, including large companies, medium and small businesses and individual entrepreneurs.

For more information on business partner engagement, see p. 51.

RESULTS

- Developing tendering procurement procedures
- Preventing supply chain corruption
- Organising training events for suppliers and contractors
- Participating in international and national professional associations

VTB ENSURES EQUAL COMPETITIVE CONDITIONS THROUGH AN UNBIASED AND EFFECTIVE SELECTION OF SUPPLIERS AND CONTRACTORS IN KEY AREAS OF THE GROUP ACTIVITIES.

VTB’S EFFICIENT CORPORATE CULTURE IS ACHIEVED PRIMARILY THROUGH AN EFFECTIVE SYSTEM OF INTERNAL COMMUNICATIONS, THE MAIN PRINCIPLES OF WHICH INCLUDE ACTIVE EMPLOYEE INVOLVEMENT, EFFECTIVE FEEDBACK CHANNELS AND DYNAMIC GROWTH AND DEVELOPMENT.
Society

The VTB Group pays significant attention to building partnerships with non-governmental organisations in order to ensure sustainable economic development in the regions of operation and improving the quality of life of their residents. We continuously work with local authorities, the media and non-governmental organisations to implement social investment programmes.

As a result of such cooperation, a number of large-scale charity and sponsorship projects supporting mass sports, culture and the arts, as well as health, education and social welfare programmes are implemented each year. VTB is also a member of a number of professional associations and business unions.

Targeted sponsorship and charity support

Supporting higher education institutions, undergraduate and postgraduate students and young scientists

Supporting healthcare institutions and participation in projects related to development of advanced healthcare technologies

Joint projects with non-profit and charitable organisations

Improving the financial literacy of the population

Interaction with mass media

Development of a website on VTB-Russia social projects

Social media accounts

OUR COOPERATION WITH NGOs IS BASED ON THE PRINCIPLES OF CONSISTENCY AND SUSTAINABILITY AND IS CARRIED OUT IN STRICT COMPLIANCE WITH RUSSIAN LEGISLATION AND THE INTERNAL REGULATIONS OF GROUP COMPANIES.
Affordable lending: the interest rate of 8% per annum is one of the lowest on the market, allowing entrepreneurs to save on loan payments and implement their plans.

New digital solutions: the vast majority of settlement transactions at VTB are available to medium and small businesses online.
VTB BELIEVES THAT RESPONSIBLE BANKING MEANS, FIRST AND FOREMOST, TAKING RESPONSIBLE CORPORATE DECISIONS THAT, IN THE LONG TERM, HAVE A POSITIVE IMPACT ON THE SOCIAL AND ECONOMIC DEVELOPMENT OF THE REGIONS OF OPERATION.

“In 2020, the Russian economy was hit by a “perfect storm”, and VTB Group took an active part in the implementation of initiatives to support the economy. VTB’s corporate and investment loan portfolio reached RUB 7.4 trillion during the year, and the total volume of restructuring organised by VTB for large businesses amounted to RUB 1.3 trillion, which helped our customers through the most difficult periods of the crisis”.

Yuri Soloviev
First Deputy President and Chairman of the Management Board, VTB Bank

Approach to Management and Key Results

Following the principles of responsible banking, the Group provides financing to socially important industries, ensures the territorial and social accessibility of banking services, and increases the security of financial transactions.

In 2020, VTB Group achieved significant operating results:

- Total loan portfolio growth: VTB Group’s total loan portfolio increased by 14.8% to RUB 13,162.6 billion. Excluding the effect of currency revaluation, the growth of the total loan portfolio at year-end was 9.2%;
- Increase in customer funds: growth of 16.9%. The volume of the customer funds reached RUB 12,831 billion. Excluding currency revaluation, the increase was 10.5%;
- Customer support during the COVID-19 pandemic:
  - Preferential financing for 75 groups of companies of large businesses, the total volume of restructured loans amounted to RUB 1.3 trillion;
  - The volume of restructured loans to small and medium businesses amounted to about RUB 230 billion;
  - Repayment holidays were provided to 400 thousand retail customers, debt restructuring totaled more than RUB 300 billion.

Number of VTB Bank customers in 2020

- Corporate and Investment Business: 1,997 thousand customers of groups of companies
- Small and Medium Business: 636 thousand active customers
- Retail Business: 14,314 thousand people
Responsible Financing

VTB pays significant attention to supporting projects aimed at developing the social and economic potential of the regions and countries of operation. Group companies provide services to support priority economic sectors, the development of small and medium-sized businesses, as well as projects in the field of housing and public utilities, healthcare and infrastructure construction.

By financing socially significant projects and working closely with the government, VTB contributes to the economies of the regions and countries in which it operates by providing employment and generating labour income, as well as generating tax revenue for municipal, regional and national budgets. VTB also helps small and medium businesses meet their objectives in the most effective way possible by adjusting and developing its services. Particular attention is paid to the development of innovative digital technologies.

VTB and Rostelecom PJSC launched Russia’s first universal geo-analytics platform

The company Big Oto Platform, created in the spring of 2020 by VTB Bank and Rostelecom has developed the first universal geo-platform in Russia based on the analysis of impersonal data using automatic machine learning methods. The platform makes it possible to forecast demand, customer flows and other factors in specific locations in order to make decisions about the location of retail outlets, offices, advertising facilities, as well as to assess the investment appeal of buildings and land.

The geo-platform compares 170 layers of impersonal data from banking, telecom and digital services and suggests the best site for a new hair salon, billboard or residential development.

The data collected in a single geo-grid allows the use of automatic machine learning methods, which speeds up the process of bringing products to market. The technologies can be adapted to a company’s specific needs within a week.
Developing Russia’s transport system

In supporting the development of the transport sector in the Russian Federation, VTB Group not only facilitates accessibility to the regions of operation and increases the mobility of the local population, but also sees its objective in the implementation of the principle of high-quality infrastructure investments. In addition to economic results, social and environmental impacts are taken into account in the implementation of projects.

In 2020, VTB and the St. Petersburg City Government agreed on the implementation of major urban transport projects:

- The parties reached an agreement on joint activities to ensure the uninterrupted and continuing construction of facilities for the St. Petersburg Metro. VTB registered the Metrostroy of the Northern Capital JSC company, 65% of shares of which were donated to the city. The main activity of Metrostroy of the Northern Capital JSC is the design, construction and reconstruction of subway facilities;
- The parties signed an agreement on the implementation of the project on the construction of the Vitebsk interchange of the Western High-Speed Diameter on the basis of public-private partnership. The construction cost of the interchange is estimated at RUB 27 billion.

The project for the construction of the eastern exit from Ufa to the M-5 “Ural” federal highway is being implemented under a concession agreement between the Bashkir Concession Company (part of VTB Infrastructure Holding) and the Government of the Republic of Bashkortostan. The construction of the Eastern Exit will not only increase the capacity of Ufa’s road network, but will also increase tax revenues to the budget of Bashkoria and increase its investment attractiveness. New jobs will be created thanks to the project’s implementation: more than 13 thousand people will be employed at the peak of the construction, and more than half of the personnel will be residents of Bashkoria. The project contributes to the development of small and medium businesses in the construction zone, as well as the emergence of opportunities for the development of new areas of Ufa.

Social and economic benefits from the implementation of VTB’s infrastructure projects

Socio-economic effects are not directly reflected in the commercial performance of infrastructure facilities, but lead to an increase in indicators of socio-economic development of the subjects of the Russian Federation and municipalities, among which include:
- the creation of new jobs and increased wages;
- improvement of the quality of life, and increase of the mobility of the population;
- an influx of qualified personnel and an increase in labour productivity;
- introduction of modern production and service technologies;
- higher environmental and safety standards;
- growth of investments;
- growth of associated business and business for infrastructure servicing.
Examples of Funding for Healthcare Projects in 2020

- A credit limit of more than RUB 9 billion for the FGUP Saint Petersburg Scientific and Research Institute of Vaccines and Serums and Enterprise for the Production of Bacterial Preparations of the Federal Medical and Biological Agency, of which RUB 3 billion was allocated to finance the production of immunobiological preparations within the national calendar of preventive vaccinations and RUB 6 billion was for the modernisation and technological upgrade of the production site to meet international standards for the production of preparations;
- A RUB 17 billion credit and documentary limit for Elme Messer Rus LLC (ELME MESSER GAAS GC) for the construction of a plant for the production of industrial, food and medical gases (liquefied oxygen, nitrogen, argon) in the Moglino Special Economic Zone in Pskov region;
- A line of credit for Meditsina JSC in the amount of RUB 5 billion for a period of nine years. Most of the Funds (RUB 3.9 billion) will be used for the construction of the Nuclear Medicine Centre in Khimki. VTB Leasing and Meditsina JSC also signed a contract to supply equipment for magnetic resonance imaging and radiotherapy at the Nuclear Medicine Institute. The project includes funding the purchase of a positron emission tomograph and a complex for the production of radiopharmacological drugs. The transaction amounted to more than RUB 400 million. The equipment will be leased to the customer for a three-year term;
- VTB Bank (Azerbaijan) allocated funds for the construction of a new building of a dental clinic in Baku, as well as for the repair and equipment of the existing premises of the clinic.

Support for healthcare projects

VTB recognises the need to support projects aimed at improving social infrastructure, so every year the Group provides financial services to companies whose operations have a direct or indirect impact on the healthcare system.

VTB Bank is a key financial partner of MD Medical Group. In 2020, the Bank helped launch hospitals in Samara, Tyumen, Ufa and Novosibirsk. In addition, in September 2020, thanks to the Bank’s financing, the second stage of the Lapino Clinical Hospital (Lapino-2 surgical complex) was opened, which was one of the largest healthcare projects in the Russian Federation.

Cooperation with companies in the housing construction sector

VTB Group actively supports the development of urban infrastructure in order to improve the affordability of housing and quality of life in the regions of operation.

The Group’s residential loan portfolio increased by 18% over the year, exceeding RUB 2 trillion. According to the results of the reporting period, VTB occupies 19.3% of the market for housing loans in Russia.

Mortgage bonds of DOM.RF Mortgage Agent LLC

In December 2020, VTB Bank completed the largest transaction in the Russian market for the issue of mortgage bonds by DOM.RF Mortgage Agent LLC secured by a portfolio of mortgage loans issued by VTB Bank. The issue with the volume of RUB 191.5 billion is intended to become a benchmark in the Russian mortgage securitisation market due to its significant volume and is intended for a broad investor base.

Mortgage bonds are a key tool used to achieve the goals set by the national Housing and Urban Environment project and Presidential Decree No. 204 dated 7 May 2018 (“Concerning National Goals and Strategic Development Objectives of the Russian Federation for 2024”), which sets out the goal of improving living conditions for at least five million families every year.
Agricultural development

VTB Group strives to make a significant contribution to the development of the agricultural sector by supporting producers of agricultural products. This creates new jobs in the sector and allows companies to increase their business volumes and produce high-quality, affordable and environmentally friendly products.

The volume of loans provided to food and agricultural companies increased by 3.7% YoY, reaching RUB 491.9 billion.

In 2020, VTB Group, in accordance with the Decree of the Government of the Russian Federation No. 1764 dated 30 December 2018, began accepting applications and granting loans to agricultural producers under the new state subsidy programme of the Ministry of Agriculture of the Russian Federation. The interest rate is up to 5% per annum. A wide range of enterprises can participate in the programme, including organisations and individual entrepreneurs engaged in the further processing or sale of agricultural products. The new mechanism enhances the competitiveness of the agricultural sector by supporting the complexity of products of the Russian agricultural sector. The volume of the loan portfolio under this programme exceeded RUB 190 billion by the end of the year.

Share acquisition in Grain Terminal Complex Taman LLC

In 2020, Demetra Holding LLC (part of the VTB Group) acquired a 50% share in Taman Grain Terminal Holdings Limited, which owns 100% of Taman Grain Terminal Complex LLC. Grain Terminal Complex Taman LLC is the only specialised deepwater terminal handling grain export for the port of Taman.

The further strategy of the shareholders of the grain complex envisages investments in the development and expansion of the terminal's throughput capacity, in particular by construction of a railway branch line allowing for the receipt of grain cargo from rail transport.

In 2020, VTB Group, in accordance with the Decree of the Government of the Russian Federation No. 572 dated 26 April 2019, began accepting applications and granting loans to agricultural producers under the new state subsidy programme of the Ministry of Agriculture of the Russian Federation. The interest rate is up to 5% per annum. A wide range of enterprises can participate in the programme, including organisations and individual entrepreneurs engaged in the further processing or sale of agricultural products. The new mechanism enhances the competitiveness of products of the Russian agricultural sector. The volume of the loan portfolio under this programme exceeded RUB 190 billion by the end of the year.

Supporting small and medium businesses (SMB)

In 2020, VTB Group companies made significant efforts to provide loan support to small and medium businesses. We continued to improve the quality of service: VTB Bank accelerated the introduction of new digital solutions for our customers. An absolute majority of settlement transactions at VTB became available to small and medium businesses remotely.

The overall number of active customers1 under the medium and small business segment increased by over 25% over 2020 to 656 thousand.

The loan portfolio of VTB Bank's SMB customers grew by 12% in 2020 year-on-year to RUB 142 billion.

In the total volume of the loan portfolio, the leading companies are companies in the field of trade, (22%), housing and commercial construction, real estate and building materials (10%), food processing and agriculture (9%), transport and infrastructure construction (9%).

In 2020, VTB Bank continued to actively participate in the implementation of government programmes, the number of active agreements under which on 1 January 2021 has reached 32 thousand. The loan portfolio of the medium and small business segment under concessional instruments increased 2.3 times compared to the same indicator in 2019 and exceeded RUB 476 billion. A significant volume of the portfolio is formed by Programma 7%2, aimed at concessional lending to small and medium businesses, and Programma 5%,3 designed to support the agricultural sector.

The aggregate loan value of these programmes in the VTB Bank portfolio amounted to RUB 327.5 billion. The total value of VTB's loans under state employment support programmes during the COVID-19 pandemic exceeded RUB 111.6 billion.

Loans for resuming entrepreneurial activity

In 2020, VTB Bank executed 21 thousand loan agreements with 2% per annum worth over RUB 92 billion to support resuming activities. The state programme for resuming entrepreneurial activity was made effective on 1 June 2020 and is aimed at supporting the industries affected by the COVID-19 pandemic. If the number of employees remained over 90%, the loan debt under the programme would be subject to a full write-off. If the number of employees remained over 80%, the Bank reimbursed 50% of the borrower’s debt.

The programme is implemented using the Federal Tax Service’s digital platform based on blockchain technology, which provides programme participants with access to the necessary information services. Among the customers supported by VTB Bank: Imperial Porcelain Factory JSC, State Academic Mariinsky Theater, Russian New University ANO VO, Mosgipa Empire LLC, Yakitoria and Restorant restaurants, Bashavtotsrans GUP, Baucentre Rus LLC, Electrotasport LLC, Ionessi shoe factory and others.

1) Active SMB customers are existing customers that have either non-zero net operating income over 12 months before the reporting date or have active salary project cards as of the reporting date.
Projects simplifying SMEs’ operations

Internet Bank

In six months of 2020, a completely new online bank was created from scratch for medium and small business customers on an omni-channel platform with a unique design, a basis for embedding products (some already available to existing customers), a universal marketplace, navigation system, and intelligent assistant, including communication with the customer.

VTB Business Lite

VTB has launched VTB Business Lite, a new mobile bank for remote banking services for entrepreneurs. The bank was named by Markswebb as one of the top 10 banks in 2020, with a customer score of 8 out of 10. VTB Business Lite is available on the App Store, Google Play and AppGallery. The application simplifies day-to-day operations while maintaining extensive functionality. VTB Business Lite provides the ability to issue invoices and make payments in a simplified form to legal entities and individuals or between accounts. For the convenience of customers, operations while maintaining extensive functionality. VTB Business Lite provides the ability to issue invoices and make payments in a simplified form to legal entities and individuals or between accounts. For the convenience of customers, the one-off payment limits were increased to RUB 300,000.

VTB Cash Desk

VTB expanded its line of settlement services for medium and small businesses and launched a pilot VTB Cash Desk product. The product combines the functions of an online cash desk and acquiring terminal. The compact wireless smart terminal with an integrated barcode scanner accepts bank cards, prints sales receipts and sends data to the Federal Tax Service in real time. The equipment is provided to customers at no extra charge. The cost of connection within the product depends on the selected service plan. By the end of 2020, the service would be available in six Russian cities.

Cifra

VTB has launched Cifra, a digital accounting service for small and medium businesses. The service helps individual entrepreneurs fully automate accounting and tax records. The service includes the tools necessary for an individual entrepreneur to organize a full-fledged document flow. Cifra supports multi-bank, the user can manage multiple accounts opened in different banks. The service automatically uploads information about transactions, calculates and sends tax and other mandatory payments, forms declarations and other documents. In the live chat customers can get an accountant’s advice on any issues related to the financial support of their business. VTB has also recently introduced the possibility for entrepreneurs to receive prompt assistance with legal issues.

VTB Business QR

VTB has developed VTB Business QR, a mobile app for all medium and small business customers, which allows entrepreneurs to accept QR-code payments through the Faster Payments System with a low fee, without the need for cards or terminals. In order to receive QR-code payments, entrepreneurs should have a current account with VTB Bank and install the VTB Business QR app on their smartphones; no additional equipment is required. Payments can be made instantly, as after registering with the app, users can conduct transactions online. For self-employed individual entrepreneurs, the functionality of the service also allows them to create and send a receipt to the customer, keep records of income from non-cash and cash transactions and create receipts for tax payments.

Digital Onboarding for VTB Factoring Customers

VTB Factoring has implemented an onboarding system that allows any customer system to be integrated with the GetFinance electronic document flow (EDF) system. The service is designed for representatives of medium and small businesses. The digital onboarding process involves identifying the customer and remotely entering into an online factoring agreement with them, as well as the launch of financing for paperless signing of notifications by debtors using the EDF systems. Thanks to the digitalisation of the remote onboarding process, any customer in the medium or small business segment, regardless of the size of the business or geography, can become a customer of VTB Factoring with only an authenticated electronic signature. This gives the Customer access to financing on competitive terms from VTB Group, as well as allowing them to use effective factoring solutions and technologies.

Special accounts

In 2020, in order to develop the Special Accounts business line, VTB implemented a service that allows the exchange of electronic documents between the customer and the Bank via the remote banking system as part of the procurement of goods/services in the format of electronic tenders.

Onboarding

In 2020, the Bank built a target customer pathway for onboarding (reserving and opening of the first and subsequent accounts of new customers) which, thanks to the unification of the Bank’s IT landscape, became available to all customers. As part of onboarding, remote reservation of a current account on the Bank’s website using minimal customer data was implemented, as well as an opportunity to open a current account for individual entrepreneurs in 20 minutes in the presence of the customer.
VTB Bank actively promotes the development of regional small and medium-sized businesses. For example, in 2020 the Bank provided:

- Three lines of credit in the total amount of RUB 5.8 billion to Susumanalkto JSC. The funds were used to implement gold mining plans and to build a mining and processing facility at the Verkhne-Alinskoye gold ore deposit in Zabaykalsky territory;
- Medium-term financing for the construction of a hotel and business compound in Petropavlovsk-Kamchatsky. Two lines of credit worth RUB 2 billion were extended to Novy Dom LLC under the preferential lending programme (Programme 1764). The project value is RUB 5.5 billion;
- Financing for the purchase of a fishing vessel by Kamchatkaflot LLC in the amount of RUB 460 million, the funds were granted for a period of five years;
- A line of credit for the Mir Remonta (World of Repair) company in the amount of RUB 580 million for a period of four years. Part of the funds will be used for the implementation of the investment project to preserve a cultural heritage site – the building of the Molot publishing house in the centre of Rostov-on-Don.

The VTB Group’s subsidiary banks also provide support to companies in the countries and regions of operation:

- VTB Bank (Kazakhstan) and the leading operator on the telecommunications market of the Republic of Kazakhstan KazakTel JSC signed an agreement on granting a credit limit of KZT 6 billion for a period of 36 months to the company;
- VTB Bank (Armenia) restructured 22,000 corporate loans for AMD 400 million of deferred payments within the announced repayment holiday;
- VTB Bank (Georgia) granted a loan in the amount of GEL 670,000 to Georgian Fruits cooperative for the construction of a refrigerating facility in the village of Sakebo, Sighnaghi district.

denis bortnikov
Deputy President and Chairman of the Management Board, VTB Bank

“Our strategic objectives are to support the economy of the country’s regions, customer focus and development of digital products and services. Moving toward our goal of becoming the bank of first choice for our customers, we are improving our processes to make the full range of services available to entrepreneurs as much as possible and to meet all of their business development needs. VTB uses the best international and our own practices to develop and implement cutting-edge technological solutions, thus contributing to the growth of our customers’ businesses."

VTB Bank launched biometrics and thermometry pilot project for campuses

In 2020, VTB launched a pilot project with the Moscow State University of Medicine and Dentistry named after A.Evdokimov. The pilot project includes the launch of a biometric and thermometric facial recognition system for students and teachers at the entrance to the university.

The pilot project is implemented jointly with O’Vision, a start-up, a participant of the VTB Accelerator, a Russian developer of contactless biometric devices and a facial recognition system based on computer vision and machine learning technologies.

The new technology is integrated into the building’s access control system and solves several problems at once: employee identification through a database and contactless temperature measurement, which has a positive impact on the epidemiological situation in the university.

Based on the results of the project’s piloting, it is planned to launch the technology on a broad market. It will enable the development of a convenient and modern ecosystem for participants in campus projects. The service can be integrated not only into the pass system, but also into other systems, such as contactless payment for meals, parking, etc.

Results of the two sets of the VTB Accelerator

- 42 pilots launched
- 10 solutions launched or ready to be launched
- 27 pilots completed
- 40 VTB departments are interested in piloting the technology

VTB ACCELERATOR

VTB Accelerator is a platform for cooperation between technology start-ups and the Bank’s business units, which select solutions that interest them and allow them to launch pilot projects.

VTB specialists test innovative technologies and assess their maturity, potential business impact and opportunities for integration into the banking infrastructure.

In 2020, the second cycle of the VTB Accelerator was completed. At the request of the Bank’s business units, 16 innovative solutions of technology start-ups were pilots. Twelve of them have begun testing their solutions at the Bank and another four are in the preparation stage. The selected pilots include facial recognition payment technologies, mobile electronic document signing technologies, HR services etc.

Closer to Business information and educational portal

Closer to Business is an Internet portal created by VTB, aimed at providing information support to entrepreneurs. In 2020, the number of users on the portal increased 20 times, the number of new users amounted to 50 thousand people. The portal offers free online training from market professionals, a wide range of courses, business cases, webinars, expert articles, and e-library resources. Such activity of entrepreneurs confirms that the Closer to Business platform can act as an assistant and business mentor for both beginners and more experienced entrepreneurs.

VTB uses the best international and our own practices to develop and implement cutting-edge technological solutions, thus contributing to the growth of our customers’ businesses.”
VTB’s Approach to Accessible Banking Services

- Accessibility of banking services to different segments of the people;
- Developing financial literacy;
- Territorial accessibility;
- Accessibility of services for people with disabilities;
- Improving the quality of banking services.

For many students this card could become the first banking instrument, thanks to which it will be possible not only to pay for purchases safely, quickly and comfortably, but also to learn to manage money wisely and plan their expenses. A similar campus project was launched for employees and students of Yaroslavl State University named after P. Demidov. In total, VTB attracted 175 thousand customers to its campus projects in 2020.

Comprehensive banking services for military personnel

In 2020, VTB Bank signed a cooperation agreement with the Federal Penitentiary Service of Russia (FPS of Russia). The main objectives of the agreement are to provide comprehensive banking services to the internal service’s military personnel and the civilian staff of the FPS of Russia, including payroll projects. In addition, the document provides for joint work to improve the financial literacy of employees of the FPS of Russia, assistance in implementing social programs as well as support for family members of military personnel of the internal service who find themselves in difficult life situations.

VTB Bank is implementing a joint project with the Federal Bailiff Service (FBS of Russia) to automate the payment of military pensions. There are plans to scale this digital solution for use by other law enforcement agencies.

Car Loans

In 2020, VTB Bank was actively involved in the programmes of state subsidies for the purchase of new cars (the First Car and Family Car programmes). The total volume of loans issued under these programmes amounted to RUB 18.6 billion, which is more than two times higher than last year.

VTB Bank launched a number of services and products to help maximise the digitalisation of its car loan granting process. In particular, it is possible to apply for a car loan online on the Bank’s website and on VTB Online with approval in a few minutes, an online display of partner cars on the Bank’s website with the possibility of booking them; a pilot of digital transactions for car loans was launched on the Bank’s mobile app.

Specialised products for pensioners

In 2020, VTB Bank launched a number of pension cards issued by VTB Bank more than doubled compared to 2019 and amounted to 190 thousand cards. Customers who have their pension accruals with the Bank receive a 4% annual interest rate on the balance of their rouble account.

VTB Bank introduced an information portal on its website detailing the process of transferring pensions, product preferences and services for pensioners. We also developed a simplified interactive voice response menu (IVR), which makes information support more effective for this category of customers.

In March 2020, more than 2.2 thousand pensioners, customers of VTB Pension Fund, received early payments under mandatory pension insurance. The decision to make early payments was made by the fund to support customers during the COVID-19 pandemic.

In order to increase the availability of remote services for pensioners in 2020, the VTB Pension Fund introduced an updated mobile application. This VTB Non-State Pension Fund (NPF) app allows users to sign non-state pension agreements, replenish their pension accounts without commission from any bank card, activate auto-payment, take part in the Non-State Pension Fund loyalty programme, compile account statements and order documents required for obtaining a social tax deduction.

Providing socially important retail services

VTB considers improving the quality of life of its customers a priority in its operations. Socially significant projects implemented by the Group’s companies are improved every year. VTB develops convenient and modern payment services, implements support measures for customers in difficult situations, offers innovative service formats and expands its mortgage product offerings.

In 2020, due to the COVID-19 pandemic, many of the Bank’s customers were faced with declining incomes. VTB developed a range of support measures to help such customers. As part of VTB’s Skip Two Payments campaign, more than 1.8 million VTB Bank credit card holders received a deferral of two minimum payments - in April and May 2020. To connect the programme, the customer did not need to contact the Bank, the service was activated automatically.

In addition to the support measures provided to borrowers by the state under the law on a grace period, VTB launched its own repayment holiday programme. The Bank expanded the number of potential participants by increasing the maximum loan amount available to affected borrowers. VTB’s programme was effective for customers whose average monthly income decreased by more than 30% compared to 2019. After the end of the repayment holiday period, the monthly payment on the mortgage, cash loan and car loan did not increase, only the term of the loan changed. The holidays were for three months. About 400 thousand customers took advantage of this programme during the COVID-19 pandemic.

We also launched a programme of refinancing with deferred payments - the opportunity to skip up to the first three payments when transferring loans to VTB in the case when the customer’s own bank did not provide repayment holiday.

In 2020, VTB Bank updated the My Smart City application. With the updated application, owners of phones with the Android operating system can independently buy a travel ticket and put it on their Troika public transport cards. The technology developed by VTB Bank is completely contactless and easy to use, eliminating the need to stand in line at cash registers and increasing the safety of using public transportation. VTB also updated its content for users of smartphones powered by the iOS operating system with a new section called City Navigator, which allows Moscow residents to view information on nearby stops of public transport, build a convenient route, order a taxi and access information on urban infrastructure.

The technology developed by VTB Bank is completely contactless and easy to use, eliminating the need to stand in line at cash registers and increasing the safety of using public transportation. VTB also updated its content for users of smartphones powered by the iOS operating system with a new section called City Navigator, which allows Moscow residents to view information on nearby stops of public transport, build a convenient route, order a taxi and access information on urban infrastructure.

New format VTB branches

In 2020, VTB Bank announced the launch of a new branch format. Customers of these branches can make an appointment at a time that suits them and be served at any convenient office location. They can also identify themselves using their smartphones, receive video consultations and perform transactions using self-service machines. This reduces waiting times by a third and increases office efficiency by 40%.

The new offices are designed to provide personalised attention to the customer and the most comfortable experience at all stages of service.

Before visiting the branch, the customer can make an appointment for a convenient time via WhatsApp chat-bot – in this case the employees will prepare all the necessary documents for the customer’s visit in advance. At the entrance to the office the customer is automatically identified by the phone’s MAC-address (a unique identifier of each device with access to the network), receives a personal greeting and directions to the desired desk or meeting room directly on WhatsApp on their smartphone.

A VTB specialist conducts less routine operations and acts as an expert, helping to find the best solution for the customer’s task and advising them on how to use online services.

A total of six branches of the new format were opened in 2020. Next year it is planned to open a number of other branches in different regions of the Russian Federation.
Support for home buyers

"The final issuance of mortgage loans in 2020 was even higher than we expected, amounting to a record RUB 4.2 trillion for the Russian market. VTB also demonstrated the largest result in its history, issuing mortgages worth nearly RUB 1 trillion. This growth was facilitated by business digitalisation in the COVID-19 pandemic and lower rates, and a preferential state programme. We are proud that VTB is helping more and more families improve their housing conditions."

Anatoly Pechatnikov
Deputy President and Chairman of the Management Board, VTB Bank

In order to improve the affordability of housing and improve living standards, VTB Group actively develops mortgage lending, and is one of the leaders with a market share of over 23% in the Russian Federation. VTB is a strategic partner for a number of major real estate developers in Russia.

In 2020, VTB Group provided 354 thousand mortgage loans worth a total of RUB 855 billion. This is the largest result in the history of VTB, which is almost 38% higher than in 2019. The Group’s mortgage loan portfolio increased by 18% over the year, reaching RUB 2 trillion.

In 2020, VTB Bank was the first bank in Russia to launch a government programme to subsidize mortgage lending, which aimed to support the industry and citizens in the crisis associated with the COVID-19 pandemic. The mortgage interest rate under this programme was 6.1% (in September 2020). In total, more than 63 thousand loans worth about RUB 198 billion were issued under these conditions in 2020.

VTB Bank also reduced the rate on mortgage loans under the government subsidy programme for customers purchasing real estate in the Far East (Far Eastern Mortgage) from 2% to 1%. After the rate reduction, the demand for concessional loans under this programme increased 2.5 times. The leading regions in terms of the volume of contracts signed are Primorsky territory (RUB 5.6 billion), Khabarovsk territory (RUB 2.9 billion) and the Republic of Sakha (Yakutia) (RUB 2.26 billion).

In 2020, VTB Bank continued to increase the availability of mortgages to certain community groups, in particular:
- About 1 thousand members of the military used the service of concessional lending, the total amount of issued loans amounted to RUB 19.9 billion.
- More than 10 thousand recipients of maternity capital were able to use it to improve their housing conditions. In 2020, VTB introduced an option for this group of borrowers to receive a mortgage loan without a down payment, provided that the amount of maternity capital is at least 5% of the housing price.

In 2020, VTB Bank launched its own mortgage programme to support families with children. Under this programme, customers who have a second or subsequent child (born after 1 January 2020), when buying an apartment, can receive a discount of 1% of the base rate of the Bank. Preferential terms of the programme are available to customers with children when buying apartments in both the secondary and primary markets. This programme was launched for those customers who would not take advantage of the state programme “Mortgage with state support for families with children”. As part of this programme, VTB issued almost 2 thousand loans worth a total of RUB 5 billion.

In 2020, VTB actively continued to digitalise its mortgage products. Customers from all over Russia were able to apply for a mortgage loan remotely. The share of remote applications grew from 5% in 2019 to 20% in 2020.

In 2020, the number of developers from whom it is possible to get a mortgage loan launched by VTB Bank is fully digital and does not require a visit to the Bank’s office. You can apply for a mortgage on the developer’s website. After it is approved by the Bank, the customer signs all documents remotely using the reinforced qualified electronic signature issued by the certification centre. The transaction is settled online through the Secure Settlement Service.

Financial literacy

VTB Group considers it essential to improve financial literacy among the population. Ensuring that people have the knowledge and skills necessary to make informed and effective decisions on various aspects of personal financial management, such as savings, investment, property, insurance, tax and pension planning, has a significant impact on their quality of life.

In 2020, the Bank launched a number of initiatives aimed at improving financial literacy among various community groups. VTB is also involved in partnership projects. In particular, VTB is a member of the Association for Development of Financial Literacy (ADFL). The ADFL is responsible for the scaling up of successful financial literacy initiatives, as well as supporting, coordinating and training volunteers in this area. In 2020, VTB Bank participated in events organised by the ADFL, including the Digital Week of Financial Literacy in the regions of Russia, the Moscow International Salon of Education, the final stage of the 6th All-Russian Congress of Financial Education Volunteers, etc.

Projects to Improve Financial Literacy

- Joint events with the Moscow City Department of Education and Science (the I am an Entrepreneur master game, lectures on financial literacy for students in grades 9-11 on the topics “Skills for the Future” and “Scammers in the Digital World”, participation in the Financial Cyberliteracy educational project);
- Webinars on financial literacy for students of Moscow Agricultural Academy named after K. Timiryazev and MGIMO;
- A series of webinars for employees of the Moscow healthcare system;
- Pilot release of the Monetary Statute training material together with the Ministry of Defense of the Russian Federation to improve financial literacy of military personnel;
- A VTB representative participated in five broadcasts of the economic block of the Rules of Life TV programme on the “Russia K” TV channel dedicated to financial literacy;
- A textbook for students in grades 10-11 entitled Financial Literacy: The Digital World (more than 8 thousand copies sold).

Expanding the geographic footprint

The VTB Group is increasing the number of sales offices in the countries and regions where it operates, expanding the network of ATMs and striving to improve the quality of its products and services for all customers, regardless of the remoteness of the region or the capabilities of the customer. During the COVID-19 pandemic, the role of remote banking services increased significantly. In 2020, VTB paid particular attention to the digitalisation of its products.

In 2020, VTB continued to provide services to retail customers in Russia, Azerbaijan, Armenia, Belarus, Georgia, Kazakhstan, Germany, and Austria. The Group operates a total of 171,134 sales offices, 91% of which are located in Russia.

One of the key goals of customer service is to increase the accessibility of financial services to people living in small or distant locations.

In 2020, the VTB Group operated 17,000 ATMs across Russia.

Increased accessibility of banking services for people with disabilities

The VTB Group strives to provide equal access to its services for all customers. To this end, VTB introduces technology for people with disabilities into its digital products, and also equips its branches with the necessary infrastructure.

ADAPTING PRODUCTS AND SERVICES FOR THE BLIND AND VISUALLY IMPAIRED CUSTOMERS: VTB strives to take into account the special needs of blind and visually impaired customers. In 2020, VTB Bank adapted VTB Online mobile bank for this category of customers. To make it really convenient for such customers to use VTB Online, blind specialists were invited to the development team. Registration and login, the main page, as well as most of the operations in the Transfers and Payments sections have become fully available to users of the service. This is only the first stage of VTB Online’s adaptation for this customer category. In the future, there are plans to expand the range of available operations. By the end of 2022, VTB intends to make the majority of its digital channels available to customers with motor disorders, visual impairments and dyslexia.

In 2020, VTB Bank also developed a special interface for ATMs designed to service people with visual impairments. Not only VTB customers can use it, but also customers of other banks. The implemented interface contains all the necessary menu items and the text is written in large white letters on a black background. This functionality is available at over 7 thousand VTB ATMs across Russia. The Bank plans to continue developing functionality for the visually impaired across its network of ATMs in line with customer needs and recommendations.

DEVELOPING INFRASTRUCTURE TO IMPROVE ACCESSIBILITY OF THE BANK’S OFFICES FOR PEOPLE WITH DISABILITIES

VTB Bank drives to equip its branches with ramps and other equipment to make it easier for people with disabilities and elderly customers to access its services. At present 55% of the Bank’s branch network (749 branches) have the necessary infrastructure. By 2023, VTB Bank plans to provide 100% of its branches with the necessary equipment.

Subsidiary banks within the VTB Group also take initiatives to make it easier for people with disabilities to interact with the Bank. For example, in 2020 VTB Bank (Armenia) installed 12 additional ATMs with Braille capabilities; VTB Bank (Kazakhstan) opened four additional offices with specialised equipment.

Improving the quality of banking services

In 2020, restrictions imposed by the COVID-19 pandemic made remote banking services even more popular. VTB Bank actively implemented new digital services for retail and business customers. In the first half of 2020, VTB ranked second among the three leaders in the top 50 Russian banks in terms of digitalisation, as compiled by the Skolkovo Foundation and VTB Bank company.

In particular, in 2020 the Bank implemented new digital tools for working with customers:

- The procedure for accepting new customers for servicing was simplified through the use of remote service delivery channels and integration of banking systems with government sources of information. The new technology made it possible to reduce the time for opening accounts without requesting documents from customers;
- Verification of new (potential) customers has become faster – decisions are made literally in seconds without the involvement of the Bank’s employees. The Bank also eliminated the need for corporate customers to visit the Bank’s offices for an interview, which also accelerated acceptance for service;
- Updating identification information has also become possible without customers visiting the Bank’s offices: information and documents can be submitted electronically using remote banking software.

VTB Group subsidiaries are also working on digitalisation and the development of remote services:

VTB Bank (Belarus) launched an updated version of its mBank mobile application for individuals. New you can become a customer of the Bank without visiting the office by registering on the website. The new version of the service VTB mBank implemented the possibility of registration using the interbank system of identification. Thanks to this, new customers are able to access most banking services online.

VTB Bank (Kazakhstan) updated the VTB Business Online internet banking system for legal entities. Its functionality was expanded and a number of services were improved. In addition, the Bank was one of the first on the market of the Republic of Kazakhstan to offer Kazakhstani entrepreneurs the opportunity to open a current account with the Bank remotely in one day, without visits to the office and meetings with Bank representatives. The service is available in 17 major cities of the Republic of Kazakhstan.

VTB Bank (Belarus) introduced an innovative service for legal entities, which allows them to accept payments for goods and services using QR codes. The Bank annually upgrades Internet and mobile banking, in 2020 online deposit services were added, the possibility of filing online applications for documentary services appeared. The Bank also implemented non-banking services Register Your Business Now, Personal Lawyer for Business, Online Accounting, which provides access to the most demanded services for businesses in one place.

Digital solutions for VTB’s retail customers

New VTB Online

In 2020, VTB launched a completely new mobile Internet bank for its customers. The new VTB Online is now twice as fast, with a login speed of only 2-3 seconds and a 10-fold reduction in interface response time. The speed of payment and transfer operations has also doubled. Switching between sections is now instant, within one second.

The load limit for using VTB Online has tripled. Now the application can handle up to 130 thousand users per minute, and in the future, up to 400 thousand simultaneous sessions.

The application has become even more secure for customers. Additional protection against social engineering was implemented, monitoring remote management of customer devices was expanded. Phishing is detected and blocked within a record-short time frame of just 24 hours.

More than 50 new functions have been added to VTB Online. Customers can withdraw money from VTB ATMs without a card using a QR code, sort all their spending by category, create savings targets, transfer currencies to other VTB customers, apply for digital credit cards and much more.

The number of active VTB Online users exceeded 10.1 million in 2020. The annual growth in users amounted to 25%. In 2020, 56% of deposits, 56% of savings accounts and 25% of consumer loans were issued through VTB Online.

Improvements to VTB Mobile

In 2020, the VTB Mobile operator became available to all retail branches of VTB Bank in Moscow and St. Petersburg (including the Vozrozhdenie Bank network). In 2020, remote signing of contracts with SIM card delivery became available for VTB Mobile users, as well as remote eSIM connection and extended customer support through VTB Online Chat. Over the year, VTB Mobile subscriber base increased from 4 thousand to 289 thousand people.

VTB My Investments application update

VTB Capital Investment released an updated version of VTB My Investments mobile application. The new version has an improved design and expanded functionality for analysing investment portfolios. The portfolio structure was visualised by asset groups, sectors, and currencies. The full composition of the portfolio can also be viewed broken down by agreement with an indication of the share of a particular asset in the portfolio. Dividend histories and planned payouts are now available for all foreign stocks.

Over 260 thousand people are active users of VTB My Investments daily. In 2020, VTB My Investments saw five-fold growth in its user base.
Customer satisfaction assessment

KPI system applies to all levels of employees in the Retail Business segment, from business line management to individual contributors at sales offices and the contact centre.

The network’s branches hold regular events that include sharing best practices in customer service, as well as Service Weeks to work through the most problematic areas.

In 2020, the frequency of interaction with customers in order to receive feedback on the Bank’s work increased. 19 service satisfaction surveys were conducted, 16 of which were for retail customers, two for SMBs and one for large corporate customers. The surveys were designed to measure customer loyalty and satisfaction both when interacting with the Bank across different channels and when using its product services.

VTB Group banks also conduct customer satisfaction surveys, which aim to maximise customer satisfaction. For example, at VTB Bank (Armenia) customer satisfaction stood at 9.42 out of possible 10 points by the end of 2020.

Customer satisfaction assessment

VTB strives to constantly improve the quality of its work and customer service for all customer groups. For this reason the Group’s banks carry out annual research to assess customer satisfaction with the service provided across branches. An independent assessment of retail customer loyalty, which included over 11 thousand interviews, ranked VTB Bank among the top five Russian retail banking institutions.

VTB Bank continues to actively improve its system for regularly assessing the quality of customer experience. Monitoring is carried out at 35 different touchpoints. Over 10 thousand VTB customers have the opportunity to provide detailed feedback on the quality of VTB customer service and offer suggestions for its improvement.

In 2020, VTB Bank introduced a system of Key Performance Indicators (KPIs) for the quality of all customer service channels in the Retail business. The target

The VTB Contact Centre was recognised as one of the best in Europe

On 16 March 2021, a grand ceremony announcing and awarding the winners of the European Contact Centre & Customer Service Awards (ECCCSA) international nomination programme was held in London. The VTB Contact Centre surpassed all of its Russian competitors and won in two nominations. Second place was awarded in the most prestigious category Contact Centre of the Year (large). The VTB Bank privileged customer service team came third in Europe in the category Best Large Customer Service Team.

The VTB team received eight awards at the Crystal Headset Contact Centre Industry Contest

The VTB Contact Centre was highly praised by the jury in the Best Contact Centre category (over 500 people). In a challenging 2020, the Bank received a record number of inquires – over 58 million, improved the quality and efficiency of customer service, expanded the interactive voice menu, and implemented speech analytics.

The team of the Quality Control Unit of the Customer Service Department won in the Best Quality Control and Assessment Team category. The team developed customer service rules called Cosmos and taught operators to do more than they are formally required to do when dealing with customer issues. With the implementation of these rules, the speed of resolving issues has increased (the average dialogue time with a customer is 35 seconds less than market best practices); 87% of customer issues are resolved in one call, 2% higher than market best practices; and 85% of customer evaluations are 4-5 on a five-point scale.
Increasing the Security of Financial Services

Measures to improve the security of financial services

Creation of the Security Testing Service

In the course of reorganisation of the Bank’s Security Department, a new functional area was created within its structure, which performs such special tasks as penetration testing of the Bank’s infrastructure, analysis of vulnerabilities in the Bank’s infrastructure objects, analysis of vulnerabilities in the applied software, organisation of vulnerability management, security testing and control of security of third-party components used in the production of the Bank’s technological products within the scope of its competence.

Conducting inspections

Ten VTB Group companies were inspected to examine how they deal with current threats associated with the risks of targeted attacks using viral software.

Software update

Continuous software updates and maintenance of self-service devices are organised and carried out.

Blocking phishing websites

Measures are taken on a daily basis to timely identify and block phishing sites and counter calls to customers from spoofed phone numbers.

Interaction with law-enforcement authorities

Interaction with law-enforcement authorities was arranged in order to resolve issues requiring prompt response to unlawful actions committed by malefactors. Based on statements by employees of the Bank’s Security Department, more than 200 criminal cases were initiated to investigate unlawful acts of thefts of the Bank and its customers’ funds, disclosure of banking secrets, etc.

Informing Customers

The Bank continuously informs its customers about security measures when carrying out financial transactions, including when using bank cards and the VTB Online remote banking system.

Information about the most common types and methods of fraud is communicated to customers in various ways, including posting it on information stands at the Bank’s branches, on the Bank’s official website, on information screens of self-service machines, as well as by sending relevant information via SMS and email. In particular, the Memo to customers on financial security, information about the most commonly used fraud schemes is posted on the Bank’s official website in the Security section at https://www.vtb.ru/bezopasnost/.

WE connect INVESTORS TO ESG-responsible COMPANIES

VTB – Equity Fund, Responsible Investment launched by VTB has raised over 500 million roubles in new customer funds.
RESPONSIBLE INVESTMENT

“Investments are an increasingly popular way for individuals to save and grow their wealth. We have seen a significant influx of investors into the market and would like to allow them to invest responsibly and follow global ESC practices. Companies that meet ESG metrics are attracting more and more attention from investors worldwide, and we are confident that this approach will also be in demand in Russia. It is important for both our investors and us that investments do not just perform financially, but work for the benefit of all stakeholders including employees and society as a whole.”

Vladimir Potapov
VTB Capital Investments Chief Executive Officer, Senior Vice President, VTB Bank

Management of Largest Endowments in Socially Significant Spheres of Society Development

VTB Capital Investments is the market leader in endowment fund trust management services, with over RUB 11 billion under management.

The company successfully invests special-purpose capital funds of the country’s largest endowments in education, culture and art, science, non-professional sports and other critical areas of community development. VTB Capital Asset Management JSC has the largest endowment pool in Russia under management with over RUB 11 billion, including the Special endowment fund for Support and Development of Skolkovo Institute of Science and Technology, the State Tretyakov Gallery Support Fund, as well as endowments at major universities (MGIMO, St. Petersburg State University, HSE, Law Enforcement Academy, Plekhanov Russian University of Economics, Financial University under the Government of the Russian Federation, etc.) and a number of other socially important funds.

Issues Regarding Social and Green Bonds by Russian Railways OJSC

In 2020, VTB Capital acted as one of the organizers of a RUB 100 billion placement of Russian Railways OJSC green perpetual bonds.

The transaction was the first market placement of green bonds in Russia for a state corporate borrower with the highest credit quality. In addition, the transaction was the largest rouble-denominated bond placement in Russia and the CIS, and the largest perpetual bond issue by a corporate issuer in the CIS, Eastern Europe and the Middle East. Cash proceeds from the placement of the bonds will be used to finance green projects of Russian Railways.

The bond issue was recognised by the Expert RA rating agency as compliant with the Green Bond Principles of the International Capital Markets Association and the Russian national methodology developed under the guidance of VESIIF.

VTB Capital also acted as a co-organiser of a CHF 250 million six-year green bond placement by Russian Railways. This placement was the first issue of Swiss francs in the green format among issuers in the CEEMEA region, under the framework of which it was possible to achieve the lowest coupon rate in the history of the placement of Russian Railways Eurobonds in different currencies. The proceeds from the placement are to be used by Russian Railways to finance green projects, including the purchase of electric trains.

Vertically, VTB Capital also acted as a co-organiser in the placement of Russia’s first ever social Eurobonds of Russian Railways in the amount of RUB 25 billion, maturing in March 2028. This was the longest ever public placement of Eurobonds denominated in Russian rubles by a Russian issuer. The proceeds from the Eurobond placement will be used to finance and refinance expenses related to the implementation of the Company’s social projects.

The issue was prepared in accordance with the Social bond principles, International Capital Markets Association. The confirmation of compliance for Russian Railways is provided by Sustainalytics.

Investment Programme with an Embedded Charity

In 2020, VTB Capital Investments launched a programme with an embedded charity, under which the management company will allocate 20% of the asset management fees of the VTB Gold Open-end mutual fund to the Old Age in Joy charity fund.

The Old Age in Joy charity fund has been operating since 2011. The foundation’s strategic goal is to build a system of assistance in Russia that will be available to every elderly person who finds themselves in a difficult life situation. Currently, the Old Age in Joy charity fund supervises more than 350 nursing homes and psycho-neurological residential institutions across Russia. VTB has been providing charitable and volunteer support to the fund since 2017.

During 2020 when the programme with embedded charity was in operation, VTB Capital Investments transferred more than RUB 4 million to the Old Age in Joy charity fund. The funds were used to provide medicines and non-contact thermometers to three nursing homes for the elderly and disabled, to pay additional employees for the care and recreation of boarders, and to buy Christmas presents.

In addition, in 2020 VTB Capital Investments agreed the practice of allocating one-time assistance upon request for charitable fund projects from the management company for managing the investment fund, and supported the Help me do it myself project of the Different Kids (charitable fund a charity fund helping children from boarding schools, children with Down syndrome and children with disabilities).

In the future, VTB Capital Investments plans to launch new embedded charity programmes, and it aims to expand cooperation with other charity funds.

“Investments are an increasingly popular way for individuals to save and grow their wealth. We have seen a significant influx of investors into the market and would like to allow them to invest responsibly and follow global ESC practices. Companies that meet ESG metrics are attracting more and more attention from investors worldwide, and we are confident that this approach will also be in demand in Russia. It is important for both our investors and us that investments do not just perform financially, but work for the benefit of all stakeholders including employees and society as a whole.”

Vladimir Potapov
VTB Capital Investments Chief Executive Officer, Senior Vice President, VTB Bank
In 2020, VTB Capital Investments was the first company in Russia to launch two open investment funds (OIF) for responsible investment. When managing assets, along with traditional fundamental indicators, ESG factors are taken into account: ecology, social responsibility and corporate governance. VTB Capital Investments offers its customers two such funds for investments in equity and bonds of Russian companies.

**RESPONSIBLE INVESTMENT FACTORS**

- Investing in securities of companies with the highest environmental and energy efficiency;
- Improving the credit profile of companies by attracting financing for green projects on more favorable terms than the market average;
- Direct environmental impact of investments.

**CLASSIC PORTFOLIO MANAGEMENT**

- Active management in terms of interest rate and credit risks;
- Analysis of current macroeconomic processes in Russia and worldwide, credit analysis of issuers;
- Improvement of risk/return ratio through credit expertise and duration management;
- Wide diversification of credit risk by issuers.

**RESPONSIBLE INVESTMENT FACTORS**

- The financial indicators are adjusted for the expected impact of ESG factors;
- Qualitative analysis of ESG factors;
- Data from in-house and independent research is used;
- Comprehensive assessment of ESG factors for each company in the portfolio;
- Weighting of securities may be adjusted upward or downward.

**CLASSIC PORTFOLIO MANAGEMENT**

- Focus on highly liquid, undervalued equity of Russian companies;
- Analysis of companies based on proprietary financial models;
- Regular review of portfolio assets to reflect changing market conditions;
- On a quest for new ideas (meetings with company management, visits to production sites and industry events).

**STRATEGY**

The fund strategy aims to invest in corporate bonds of Russian issuers whose environmental, social and governance factors have been integrated into the production process, with a focus on safeguarding invested capital.

**Investment object:**

- Bonds of Russian issuers

**Risk Assessment:**

- Low

**Minimum amount of investment:**

- RUB 1,000

**Net asset value of VTB Bond Fund. Responsible investments:**

- RUB 415 million

**Weighted average yield to maturity:**

- 5.9%

**Weighted average duration:**

- 2 years

**Weighted average credit rating:**

- BB+

**INVESTMENT OBJECT:**

- Bonds of Russian issuers

**RISK ASSESSMENT:**

- High

**MINIMUM AMOUNT OF INVESTMENT:**

- RUB 1,000

**NET ASSET VALUE OF VTB BOND FUND. RESPONSIBLE INVESTMENTS:**

- RUB 415 million

**Sustainability Report '20 //vtb.com**

**INDUSTRIAL DISTRIBUTION**
In 2019-2020, VTB Bank financed the construction of solar power plants in Astrakhan and Transbaikal with a capacity of more than 200 MW as well as wind farms in the Rostov region with a capacity of more than 300 MW.
ENVIRONMENTAL IMPACT MANAGEMENT

ENVIRONMENTAL FRIENDLINESS IS AN IMPORTANT ELEMENT OF VTB GROUP’S CORPORATE PHILOSOPHY. GROUP COMPANIES REDUCE THEIR NEGATIVE IMPACT ON THE ENVIRONMENT THROUGH GREEN FINANCING WITHIN THEIR OPERATIONS, BY TAKING MEASURES TO IMPROVE THE ENVIRONMENTAL EFFICIENCY OF THE BUSINESS AND ADMINISTRATIVE COMPLEX AND BY PROVIDING FINANCIAL SUPPORT FOR PROJECTS TO PRESERVE RUSSIA’S BIODIVERSITY.

“VTB Group adheres to the principles of environmental responsibility in all its activities. For us, this primarily means reducing our own impact on the environment by introducing innovative technologies that increase the energy efficiency of our offices, reduce resource consumption and reduce the amount of waste produced. In our work with customers, we also take into account the environmental impact; environmental safety is a priority in any project we finance.”

Oleg Knyazev
Head of the Administrative Department, Senior Vice President

Key priority areas

1. Green Banking:
   - Financing green projects;
   - Environmental initiatives for retail customers.

2. Improving inherent environmental performance:
   - Green office;
   - Waste recycling;
   - Paperless document flow.

3. VTB’s environmental partner projects:
   - Participation in the work of the Arctic Council;
   - Supporting the implementation of the national Ecology project;
   - Partner projects in the field of ecology.

Green Financing

Recognising the importance of financial institutions’ involvement in the creation of a low-carbon economy, VTB actively implements the principles of responsible financing in its operations and provides financial support to projects that meet the Bank’s environmental requirements.

As part of green financing, the Bank strives to provide loans to implement projects improving environmental indicators, reducing natural resource consumption, and promoting the use of renewable energy sources. In addition, VTB engages its retail customers in environmental initiatives.

Financing green industries

One of the key areas of VTB’s green financing is its strategy for financing innovative projects in the Russian energy sector aimed at reducing carbon emissions and supporting the implementation of modern technology solutions.

A WIND POWER PLANT IN THE ROSTOV REGION

In 2020, VTB provided syndicated financing for the project company of the Wind Power Development Fund, a joint investment fund created by Fortum PJSC and ROSNANO JSC on a parity basis.

The project will result in construction of a wind power plant with total capacity of 100 MW. The project is implemented on the principles of project financing and assumes the provision of credit funds against a guarantee of future cash flows under contracts for the provision of capacity of generating facilities operating on the basis of the use of renewable energy sources.

UPGRADE OF A HYDROELECTRIC PLANT IN THE REPUBLIC OF TATARSTAN

In 2019, VTB Bank and Tatenergo JSC signed the largest credit agreement in the history of the company for a total amount of RUB 36 billion for a period of 16 years. The financing will be used to implement a project to upgrade the Zainskaya hydroelectric power plant, a key facility of the energy infrastructure of the Republic of Tatarstan.

The Zainskaya hydroelectric power plant will be renovated through the construction of the most powerful combined-cycle plant in Russia, manufactured by General Electric, with a total capacity of 888 MW and unprecedented operational efficiency - the efficiency factor will be 65%.

CUTTER COLLECTION AND RECYCLING IN ST. PETERSBURG AND THE LENINGRAD REGION

In 2019 VTB Group, the Government of St. Petersburg, the Government of the Leningrad Region and Inter RAO PJSC entered into an agreement of intent to jointly address the issue of waste management and recycling in the two constituent entities of the Russian Federation.

Joint actions of the parties under the agreement will be aimed at implementing the concept of organising waste collection and recycling with the use of modern technologies in waste recycling. The project implementation meets the requirements of the national Ecology project and will help to improve the ecological situation on the territory of the regions.

About the Report
Making environmental claims in project financing

«VTB Group adheres to principles of managerial, social and environmental responsibility in the implementation of infrastructure projects, which reflect our commitment to our customers, partners and society. The principles of responsible investments oriented towards achieving sustainability goals have been firmly embedded in the infrastructure market since this approach was adopted in our projects in the early 2010s».

Oleg Pankratov
CEO of VTB Infrastructure Holding

During the concept creation stage, we study environmental impact mitigation issues and assess not only the direct effects of a project, but also the indirect ones, such as projected tax revenues, job creation, improved quality of life, territorial development and improved environmental standards.

Obligations of project companies to hold public hearings and regularly monitor and report on environmental and social issues are an important condition for the financing of VTB infrastructure projects.

ENVIROUENTAL IMPACT OF VTB'S INFRASTRUCTURE PROJECTS

Pulkovo Airport

- Separate waste collection at the passenger terminal and offices since 2012
- Weekly waste paper collection:
  - 119 tonnes of waste paper collected and sent for recycling in 2014-2019
  - 2,033 trees saved
  - 5 million kWh of electricity saved
  - 3 million litres of water saved
  - 3 tonnes of pollutant emissions prevented
- Upgrade of treatment plants to treat surface airfield runoff, totaling RUB 1.5 billion

Western High-Speed Diameter in St. Petersburg

- Regular greenspace expansion and garbage removal
- Compensation measures:
  - ~150 thousand ~150 thousand small fries released for reproduction of aquatic biological resources, tree planting on Yelagin Island
  - 82 treatment plants of different configurations, noise protection screens
  - >75 thousand per day - reduction in fuel use
  - >170 tonnes per day - reduction of CO2 emissions
- Annual industrial ecological monitoring of the negative environmental impact of the facility
- Annual hydromorphometric observation of water bodies and their water conservation zones
- Monitoring of wildlife (avifauna and ichthyofauna) and aquatic biological resources

Eastern exit from Ufa

- Natural air monitoring involving accredited laboratories
- Laboratory studies of surface water bodies, drainage mine drainage water, waste water
- Reproduction of aquatic bioresources: ~400 thousand fry of red-listed sterlet were released into the Belaya River in the Republic of Bashkortostan in 2020
- Installation of moistureproof storage tanks to collect storm water from the surface of the designed road after it has been treated
- Measures to reduce the generation of waste during construction and waste recycling
- The project has achieved viable infrastructure projects certification (IRIS) developed by the Bank for Development and Foreign Economic Affairs of the Russian Federation together with the National Centre for Public Private Partnership Development and AICOM international company with the support of the Ministry of Finance of the Russian Federation

«VTB Group adheres to principles of managerial, social and environmental responsibility in the implementation of infrastructure projects, which reflect our commitment to our customers, partners and society. The principles of responsible investments oriented towards achieving sustainability goals have been firmly embedded in the infrastructure market since this approach was adopted in our projects in the early 2010s».
Funding for energy efficiency projects

One of the VTB Group’s activities aimed at improving energy efficiency is the factoring of energy service contracts. This type of financial product represents an alternative non-collateralised source of investment resources for developing enterprises with the aim of improving their energy efficiency. Factoring of energy service contracts does not require an initial investment by the customer, and the projects implemented on its basis produce an economic effect from the date of commissioning.

Introduction of modern energy efficient technologies under the energy service contract allows to reduce expenses on fuel and energy resources by 30-50%, thereby proportionally reducing greenhouse gas emissions and increasing environmental friendliness of production.

Environmental initiatives for retail customers

Given the growing interest of its customers in the preservation of natural wealth and sharing personal responsibility for environmental quality, in 2020 VTB implemented several retail eco-projects based on the Multi-Bonus loyalty programme.

- **Mission: Clean Water**
  - An opportunity to donate part of the accumulated rewards from one’s own bonus account to the fund of the All-Russian Society of Nature Conservation to help clean up water bodies.

- **Give a Forest to a Friend! project**
  - Participation in the restoration of forests in national parks of the Russian Federation by paying for the planting of seedlings with bonus currency or roubles.

RENUNCIATION OF PLASTIC CARDS

Another important retail project benefiting the environment was the switch from plastic to digital debit and credit cards. The renunciation of plastic cards was launched in late 2019 and is one possible option to reduce the environmental impact of banking institutions. In addition, VTB considers the issuance of digital cards as an important step towards developing a digital experience in the design, receipt and use of card products.

By the end of 2020 the share of virtual cards made up 5% of issue and the turnover was around RUB 8 billion. A total of 342 thousand digital cards and 5 million cards with paperless PIN envelopes were issued in 2020 (40% of total card issue). By 2023, VTB plans to increase the share of digital cards in its total card issuance to 40%.

### RESULTS

- **EcoCard**
  - A bank card made of polylactide, an environmentally friendly biomaterial that can be easily recycled and does not pollute the environment

- **Mission: Clean Water**
  - 146 bodies of water in eight federal districts of the Russian Federation cleaned

- **Give a Forest to a Friend! project**
  - >4 million trees planted over the six years of the programme launched by Post Bank
**Improving Inherent Environmental Performance**

Reducing our own environmental footprint is a part of the VTB Group’s Development Strategy. A high degree of digitalisation and the use of innovative tech solutions across business processes call for transition to paperless internal and external workflows and to more efficient use of resources.

**Directions for reducing VTB Bank’s environmental footprint**

- **Reducing energy consumption**
  - Implementing an power saving programme and introducing power saving technologies
  - Replacing fluorescent (halogen) lights with LED lamps
  - Replacing outdated air conditioning systems with inverter units with lower energy consumption
  - Partial repair of thermal insulation of heating and hot water supply system pipes
  - Dispatching engineering systems at Bank facilities

- **Reduction of waste generation**
  - Recycling electronic waste: servers, uninterruptible power supplies, storage systems, workstations, ATMs, POS-terminals, office and household appliances
  - Sorting waste by type on-site and transferring it for recycling

- **Optimising of paper consumption**
  - Application of duplex printing

- **Reducing fuel consumption**
  - Optimisation of car fleet use
  - Optimised vehicle routing

- **Reducing water consumption**
  - Implementation of planned measures to reduce water consumption in offices

**New format green offices**

An important line of VTB’s environment-related activity is increasing the efficiency of real estate use. In order to create unified centres of operation, the Bank strives for optimal distribution of infrastructure assets by reducing office space and minimising duplicated employee functions, thus reducing consumption of resources and environmental footprint.

The new format offices implemented Smart Office automatic parameter control technology for more efficient use of resources and a higher level of environmental friendliness. They allow to optimise the temperature, humidity, light and CO₂ concentration in the room. This creates an even more comfortable environment for both employees and customers. Digital filing and signing of documents can significantly reduce the use of paper.

In 2021, all VTB’s new branches will be switched to this format, their number will increase to 135.
Green recycling of electronic waste

In the course of VTB’s digital transformation, we are carrying out a large-scale upgrade of our office infrastructure and data centres. As part of this process, we are decommissioning a large amount of obsolete equipment.

In 2020, VTB, in partnership with Corporation ECOPOLIS JSC, launched the largest project for the environmental recycling of end-of-life electronic waste and equipment: Servers, uninterruptible power supplies, racks, storage systems and workstations have already been handed over for recycling. VTB plans to hand over ATMs, POS-terminals, office and household appliances.

Recycling electronic waste and equipment will yield copper, aluminium, zinc alloys and brass, printed circuit boards, ferrous metals and plastics. Up to 95% of materials and recycled appliances become secondary raw materials.

Paperless document flow

In 2020, the Bank continued implementing the Paperless Document Flow initiative. The goal of the initiative is to significantly reduce paper consumption and cut costs by following an end-to-end approach to document management and storage.

At the end of 2019, VTB launched digital document signing technology and in March 2020 replicated the service across its entire branch network. During customer service, an employee executes a service and generates an electronic document, while the user confirms the transaction and signs all documents with an electronic signature in VTB’s mobile app. All signed contracts are stored electronically and are available to the customer in a special section at any time. Security of the technology is ensured through a range of measures confirming the authorship of documents signed by the customer, as well as through a reliable system for storing data and electronic documents.

At the end of 2020, the digital document signing service became available for 24 types of transactions, which is more than 50% of all network transactions. As a result, customers executed 4 million contracts in digital paperless format, saving more than 20 million sheets of paper weighing 100 tons and saving about 2 thousand trees.

Leban practices at VTB Bank

As part of the active application of resource-saving technologies, VTB Bank continues to implement the concept of continuous improvement (Lean). This approach implies company management based on continuous reduction of all types of loss. Lean practices involve each employee in business optimisation, focusing on customers’ needs.

In 2020, the Bank implemented a number of initiatives to improve the efficiency of work processes and move away from hard-copy paperwork. In particular, a large-scale programme was launched to transition to paperless document flow not only with the Bank’s customers, but also within internal processes. The initiative brings together various projects that increase the efficiency of working procedures and improve environmental performance.

Lean leaders and key experts - participants of Lean projects - are active promoters of Lean principles in order to reduce all types of losses. A number of remote seminars on lean practices methodology and tools were held for them in the reporting period. A total of 56 leaders and key experts were trained at the Bank in order to reduce all types of loss. Lean practices involve each employee in business optimisation, focusing on customers’ needs.

In 2020, the Bank implemented over 40 Lean projects of various levels - from small improvements and tools to large-scale upgrades of our office infrastructure and data centres.

In the course of VTB’s digital transformation, we are carrying out a large-scale upgrade of our office infrastructure and data centres. As part of this process, we are decommissioning a large amount of obsolete equipment.

In 2020, the Bank continued implementing the Paperless Document Flow initiative. The goal of the initiative is to significantly reduce paper consumption and cut costs by following an end-to-end approach to document management and storage.

At the end of 2019, VTB launched digital document signing technology and in March 2020 replicated the service across its entire branch network. During customer service, an employee executes a service and generates an electronic document, while the user confirms the transaction and signs all documents with an electronic signature in VTB’s mobile app. All signed contracts are stored electronically and are available to the customer in a special section at any time. Security of the technology is ensured through a range of measures confirming the authorship of documents signed by the customer, as well as through a reliable system for storing data and electronic documents.

At the end of 2020, the digital document signing service became available for 24 types of transactions, which is more than 50% of all network transactions. As a result, customers executed 4 million contracts in digital paperless format, saving more than 20 million sheets of paper weighing 100 tons and saving about 2 thousand trees.

Leban practices at VTB Bank

As part of the active application of resource-saving technologies, VTB Bank continues to implement the concept of continuous improvement (Lean). This approach implies company management based on continuous reduction of all types of loss. Lean practices involve each employee in business optimisation, focusing on customers’ needs.

In 2020, the Bank implemented a number of initiatives to improve the efficiency of work processes and move away from hard-copy paperwork. In particular, a large-scale programme was launched to transition to paperless document flow not only with the Bank’s customers, but also within internal processes. The initiative brings together various projects that increase the efficiency of working procedures and improve environmental performance.

Lean leaders and key experts - participants of Lean projects - are active promoters of Lean principles in order to reduce all types of losses. A number of remote seminars on lean practices methodology and tools were held for them in the reporting period. A total of 56 leaders and key experts were trained at the Bank in order to reduce all types of loss. Lean practices involve each employee in business optimisation, focusing on customers’ needs.

In 2020, the Bank implemented over 40 Lean projects of various levels - from small improvements and tools to large-scale upgrades of our office infrastructure and data centres.

In the course of VTB’s digital transformation, we are carrying out a large-scale upgrade of our office infrastructure and data centres. As part of this process, we are decommissioning a large amount of obsolete equipment.
VTB's Partner Projects in the Ecology Field

VTB takes a proactive stance in promoting and developing environmental protection in the Russian Federation and seeks to achieve this transformative goal with the implementation of projects in this field from the provision of financing to offering expert financial advice.

VTB contributes to this issue by supporting projects of the Arctic Council Project Support Instrument, participating in the national Ecology project, and providing charitable support to foundations specialising in environmental protection.

**Arctic Council**

In 2020, the Bank and VTB Ecology LLC, a special legal entity within the Group, signed an agreement with the Ministry of Natural Resources and Environment of the Russian Federation, in preparing necessary background materials and opinions on the said projects.

**National Ecology project**

Since 2019, VTB Bank has been an active participant in the National Ecology project and a member of the Business and Biodiversity working group of Russia’s Ministry of Natural Resources and Environmental Protection. The major goal of the working group was to achieve synergy in implementing corporate programmes to preserve biodiversity and protect the environment, run by Russian government agencies across designated natural areas of federal importance.

As part of this work, in 2020, an agreement was signed with the Ministry of Natural Resources and Ecology of the Russian Federation on cooperation in implementing measures within the federal project “Conservation of Biological Diversity and Development of Green Tourism.” The signed agreement will allow to implement a programme for the conservation and monitoring of rare animal populations and other activities, including those aimed at the development of green tourism.

The main projects of the Arctic Council in 2020

- Pilot project on reduction of CO₂ and black carbon emissions in the rivers of the Arctic region of the Russian Federation
- Reduction of fluorinated greenhouse gas emissions and ozone-depleting substances at fish and seafood processing enterprises in the Murmansk region
- Reduction of black carbon and methane emissions in flare emissions of associated petroleum gas in the Arctic zone of the Russian Federation
- Treatment of Solid Waste Disposal Site in the Russian Arctic

Charitable environmental projects

A separate area of VTB Bank’s environmental activities is its charitable support for foundations and organisations involved in the conservation of biodiversity.

During the cooperation between VTB and WWF since 2016, a lot of work has been done to protect the population of rare animals, including in the following areas:

- Preserving the habitats and foraging sites of these species
- Ensuring monitoring of animal diseases in their habitats
- Strengthening the effectiveness of protection
- Preventing and resolving conflict situations
- Improving the legal and methodological basis of conservation activities.

At present, the Amur tiger population numbers 280; the Amur leopard 100; the snow leopard 70; and ten Persian leopards released into the wild.

The most important charitable environmental projects by VTB

- **Amur Tiger Centre**
  - Growth of the Amur tiger population and nature preservation in the Russian Far East
  - Investment: 160 million RUB
  - Since 2014

- **World Wildlife Fund**
  - Preserving the Amur tiger, Amur leopard, and snow leopard populations, renewal of the Persian leopard population
  - Investment: 242.5 million RUB
  - Since 2016

- **Russian Geographical Society**
  - Preserving Russia’s natural, historical, and cultural heritage
  - Investment: 200 million RUB
  - Since 2017

The most important charitable environmental projects by VTB

- Pilot project on reduction of CO₂ and black carbon emissions in the rivers of the Arctic region of the Russian Federation
- Reduction of fluorinated greenhouse gas emissions and ozone-depleting substances at fish and seafood processing enterprises in the Murmansk region
- Reduction of black carbon and methane emissions in flare emissions of associated petroleum gas in the Arctic zone of the Russian Federation
- Treatment of Solid Waste Disposal Site in the Russian Arctic

At the events of the Business and Biodiversity working group in 2020, development schemes for the Kronotsky State Reserve and the Russian North National Park were approved, and reports were reviewed. Further action plans were developed to restore the Persian leopard population in the Caucasus.
In 2020, despite the COVID-19 pandemic and changes in the business processes due to the transition to a remote work format, VTB recruited more than 11,700 people.
THE SUCCESSFUL OPERATION OF VTB AND THE ACHIEVEMENT OF ITS OBJECTIVES ARE INSEPARABLE FROM THE PRESENCE OF LOYAL AND COMPETENT EMPLOYEES. AN EFFECTIVE HR MANAGEMENT SYSTEM BASED ON A PERFORMANCE-ORIENTED CORPORATE CULTURE AND A POSITIVE WORKING ENVIRONMENT ARE AMONG THE OVERARCHING PRIORITIES OF VTB’S BUSINESS STRATEGY.

As one of the largest employers in the banking industry in the regions of its operation, VTB continuously improves its approaches to HR management, implementing the best and most efficient practices.

The key drivers behind this headcount growth (2.6%) were the ongoing strengthening of VTB’s IT sector and the implementation of the 600 Day programme, which creates cross-functional teams to develop and implement services for process digitalisation and accelerated development of the Bank’s products and sales channels.

“The key factor of VTB Group’s success is the availability of a cohesive team of professionals capable of meeting complex challenges in a rapidly changing economic environment. The task of HR function is to always remain a reliable partner both for management and employees in meeting those complex challenges. For the former by helping to achieve business goals, for the latter by helping to realize their personal and professional potential.”

Gleb Ermakov
Head of Human Resources, Senior Vice President

As one of the largest employers in the banking industry in the regions of its operation, VTB continuously improves its approaches to HR management, implementing the best and most efficient practices.

The key drivers behind this headcount growth (2.6%) were the ongoing strengthening of VTB’s IT sector and the implementation of the 600 Day programme, which creates cross-functional teams to develop and implement services for process digitalisation and accelerated development of the Bank’s products and sales channels.
Human Rights, Gender Equality, and Inclusion

VTB Bank fully complies with Russian labour legislation and ensures equal employment and career development conditions for all its employees, regardless of their gender, age or ethnicity.

VTB Bank's Code of Ethics prohibits discrimination on political, religious, ethnic, gender, or other similar grounds in hiring, remunerating, and promoting employees. The Code of Ethics also prohibits securing unwarranted privileges or advantages in hiring, promoting, and rewarding employees.

VTB provides equal opportunities for men and women, creating equal conditions for training and career advancement. In 2020, women accounted for 33% of senior managers and 64% of all employees hired in the reporting period. The average number of training hours per Group employee was 39.5 academic hours and 37.3 academic hours for men and 40.4 academic hours for women. Fair remuneration and workplace equality are the purpose of a grading system the Bank put in place to objectively assess all jobs it offers.

Group companies take a responsible approach to meeting their statutory obligations to promote the employment of socially disadvantaged groups, including providing staffing positions to hire people with disabilities. In 2020, 142 people with disabilities are employed by the VTB Group.

VTB Bank operates an anonymous employee complaint hotline. In 2020, 21 complaints were filed in this way. The inquiries concerned issues of relations with the management and material incentives. All inquiries were dealt with and appropriate measures were taken as a result.

Priorities of VTB’s Inclusion Policy

- Equal career opportunities for women and men
- Promoting employment of people with disabilities
- Effective grievance mechanism

Ensuring employee safety due to the COVID-19 pandemic

From the first reports of a threat of mass morbidity, VTB took measures to protect employee health, preventing the possibility of the spread of infection.

First and foremost, more than 20 thousand employees were transferred to work remotely as soon as possible and a procedure for temperature measurement at entrances to offices was introduced. Every week, mandatory testing was conducted for employees who continued to work in our Moscow and St. Petersburg headquarters. Employees who came into contact with ill colleagues were also tested. In total, VTB Bank employees were tested over 128.9 thousand times in 2020.

Since the start of the COVID-19 pandemic, employees have received regular newsletters informing them of the work format, the quota of employees working in the office, and the testing procedure for coronavirus infection. The internal corporate portal posted materials on how to connect to a remote workplace, and an algorithm for the employee’s actions in case of COVID-19 disease was developed and published. As official data became available, employees were informed in a timely manner about the possibility of vaccination in all regions of the Russian Federation.

Daily monitoring of employee morbidity was carried out in order to organize prompt medical care. Medical experts were engaged to provide professional advice on employee safety. In addition to state medical care, additional assistance was provided through voluntary health insurance (VHI), especially for the most complicated cases of employee illnesses.
In 2020, despite the coronavirus pandemic and changes in business processes during the transition to a remote working environment, VTB recruited over 11.7 thousand employees, including 1.2 thousand for management positions, over 1.4 thousand for IT positions and 7.5 thousand for positions in the Bank’s regional network. More than 11 thousand highly qualified employees were hired as part of the development of one of the Bank’s key strategic projects, the 600 Days programme.

### Innovative recruitment technologies

One of the important initiatives in 2020 was the introduction of robotised technology in the recruitment process, making it possible to implement a convenient and paperless path from initial candidate job application to employment, as well as to improve the quality of recruitment processes and reduce recruitment time by almost half. In 2020, automated technology was used to hire around 3.5 thousand employees in VTB’s nationwide network units, representing 66% of all hires in the Bank’s network.

In 2020, the vtbcareer.com career portal was further developed. A special place on the website was taken by a section describing VTBI’s values, which are also communicated through the success stories of the Group’s employees. In 2020, the overall number of unique visitors to the portal exceeded 600 thousand, of whom 40 thousand applied to VTB’s jobs.

### For the second year in a row, the Bank is among the top 10 employers in the country according to Forbes, and regularly ranks among the top 5 of the Best Employer in Banking category according to HeadHunter, FutureToday, Universum and Best Company Award ratings.

### Career Planning at VTB

An important initiative introduced in 2020 was a large-scale Career Paths programme for employees working in VTB’s regional network. The programme aims to create a comprehensive and effective system for promoting people within the organisation, developing and retaining high-performing employees and reducing the time required for them to adapt to their new roles. The programme is automated, is delivered through the Bank’s Corporate Training Portal and is a platform that allows employees to plan their careers, declare their interest in specific job openings and formulate further steps for development.

### Attracting young talent

The VTB Group puts great emphasis on attracting young talent and engaging with potential employees – students from major universities both in and outside Russia. Every year the Bank concludes agreements with the largest universities in the regions of operation and provides internships for students.

VTB Bank has cooperation agreements with over 200 universities nationwide. In 2020, 23 agreements on cooperation with universities were concluded. The main objectives of cooperation are to improve the professional skills of graduates of Russian universities and to provide students with internships and traineeships at the Bank. During the year, VTB Bank organised 185 online events for university students.

### Personal grants programme One Step Ahead

In 2020, VTB Bank launched the One Step Ahead programme to support talented undergraduate students. More than 9 thousand students from 350 Russian universities in 16 cities took part in the competition. A total of 50 students were named finalists, each of whom received RUB 100,000 from VTB Bank for their professional development.

### Online Hackathon

The Online Hackathon was held for the first time in 2020 in two development areas: web and mobile. A total of 470 young IT specialists took part in the competition. A set of measures to work with young IT specialists helps VTB to build its positioning among the IT audience.

### VTB Internship Programme

The Bank continues to develop its internship programme for students and young specialists. A total of 524 students participated in internships in 2020, resulting in 184 new employees being hired by the Bank.

Special attention is paid to IT internships. In 2020, a new direction “IT Specialist School” was opened - development programmes combining intensive theoretical training and work in project teams with practical application of knowledge in the following directions: Java, DevOps, IOS, and automated testing. A total of 150 interns joined VTB’s IT team in 2020 (along with IT Junior graduates).
In order to help new employees adapt and train them professionally, in 2020 VTB Bank continued to actively develop its Mentoring Institute project. The current employees of the regional branches who have passed the selection procedure and specialised training are appointed as mentors.

As part of the training, the future mentors studied the functionality and tools to work with interns and learned the key aspects and effective methods of working as VTB Bank’s mentors, as well as motivation and approaches to training adults. Particular attention in the training was paid to building the skills of establishing contact with the intern, effective communication, setting training goals, and providing feedback to the intern. 29 webinars were held for 619 mentors, and 250 mentors were trained in 18 online training sessions.

In 2020, training for mentors was conducted as part of the IT Junior and IT Specialist School programme for young specialists. The training programme was developed taking into account the specifics of the target audience and the specifics of the internship programmes. As a result of the training, 58 mentors have improved their competencies in transferring knowledge and experience to interns, received algorithms for setting goals and objectives, feedback, as well as conducting mentoring meetings. By means of this approach, the interns were able to immerse themselves in the Bank’s IT processes and become part of the VTB team of experienced developers.

As part of the implementation of the human capital and corporate culture development strategy, an employee engagement survey is conducted every two years. In the reporting period, a number of initiatives aimed at increasing the level of employee engagement were implemented based on the results of the 2019 survey. It is planned to conduct another engagement survey and assess the results in the dynamics in autumn 2021.

Increasing employee engagement

As part of the implementation of the human capital and corporate culture development strategy, an employee engagement survey is conducted every two years. In the reporting period, a number of initiatives aimed at increasing the level of employee engagement were implemented based on the results of the 2019 survey. It is planned to conduct another engagement survey and assess the results in the dynamics in autumn 2021.

2020 initiatives aimed at increasing the level of employee engagement

- Automation of key processes, which allowed employees to perform their professional duties faster and more effectively, including by working remotely
- Greater opportunities for professional growth and development
- Large-scale transition to cross-functional teams
- Introduction of an innovative way to develop and launch new products
- Scaling up the succession pool programme and career paths (career development) for employees
Talent Training and Development

The VTB Group offers employees ample opportunities for training and professional development. Various training initiatives are regularly run across the Group, allowing our team members to gain new knowledge and skills so that they can realise their potential to the fullest.

The priorities for employee development in 2020 were determined by the objectives of the VTB Group’s Development Strategy and corporate values, as well as the challenges of the new reality, which call for flexibility and a readiness to change, a stronger culture of leadership and efficiency, and greater digitalisation and customer focus.

In the reporting period, training became more adaptive, based on building an individual learning path taking into account the current knowledge, abilities and motivation of employees. The absolute majority of training programmes were transferred to the online format using new digital capabilities.

Training extends to all staff, from managers at various levels to employees, including front-office staff.

The average annual hours of training per Group employee totalled 39.5 academic hours. The largest volume of training for employees among the Group’s companies was organised by VTB Bank. VTB Bank delivers 477 academic hours of training per employee, where 48.5% are e-learning courses. Over 64 thousand full-time employees received training in 2019.

Key focus areas of personnel training include adapting to work during the COVID-19 pandemic.

Success Factors in the Development of VTB Bank Employees

- Emphasis on corporate values and culture
- Adaptive training based on employee personality
- Harnessing new digital opportunities

Employee training system achievements

A significant achievement in 2020 was the implementation of the task of transferring training to an online format in order to ensure continuous and effective development of all categories of VTB personnel.

All new and current employees in our sales and support offices improved their professional qualifications and knowledge of the Bank’s products and services: more than 7,236 new employees across the regional network received basic training.

A three-month online development marathon Study at Home was held to support work in a remote format. The key focuses of the marathon were determined by the current requests and needs of employees.

Practices for preserving personal and team resourceful state

- Strengthening skills for building effective communications both within the team and with external customers
- Tools for managing remote teams
- Interaction using digital communication channels

47 thousand employees have been trained, among them 18 thousand managers and 29 thousand specialists.

390 webinars conducted.

In 2020, VTB Bank strengthened its partnerships with international business schools. Over 700 Bank managers attended courses at leading business schools, both open programmes and those adapted to the Bank’s needs on relevant subjects. All programmes are implemented in a modern educational space using high-tech platforms that allow to design an effective learning process, close to full-time learning.

The managers chose the most interesting topics from the field of global expertise, interacted and exchanged experience with the heads of international global corporations.

**Talent pooling**

In 2020, the stage of selecting candidates for the management development programme for the Bank’s regional network continued. The candidates underwent a multi-stage evaluation. The important selection criteria were the evaluation of performance and achievement of business indicators based on the results of 2019, the level of leadership potential development, and sharing of the Bank’s values.

In 2020, 266 potential managers of the Bank’s network became participants in the League of Champions succession pool programme. A development programme was launched for them, under which the succession pool members were trained at one of the world’s leading business schools - the International Institute for Management Development (IMD, Switzerland), Professors from Stockholm School of Economics, Skolkovo School of Management in Moscow, the Higher School of Economics and ESMT Berlin: Business School and ESMT Berlin: Strategy and Management in Turbulent Times.

In 2020, 266 potential managers of the Bank’s network became participants in the League of Champions succession pool programme. **Key areas of training for the Succession pool**

1. Business strategy and business expertise
2. Risk management
3. Customer experience management
4. Strategic and systematic thinking
5. Managing performance and teams in times of change

**Motivation and Remuneration**

VTB Group is working actively to improve its personnel remuneration system and working conditions. This not only helps us attract and retain the most effective employees but also improves their performance.

The incentive system in the Group’s companies aims to ensure a competitive remuneration level and provide comprehensive social support for employees.

**Remuneration of labour**

The VTB Group cares about its employees and offers them competitive salaries. Each year, Group companies carry out surveys on the salaries of their peers in order to make timely adjustments to remuneration levels, if necessary.

One significant development in 2020 was the introduction of cross-functional teams, which include experts from business, information technology, and other support and monitoring departments, creating and developing products and services to meet complex customer needs. An appropriate annual bonus system was developed for such teams, where each employee’s compensation is simultaneously dependent on the team’s fulfillment of business objectives and an individual performance evaluation determined jointly by his/her functional and administrative managers.

**Social benefits**

The group has a well-developed system of social benefits. The details of the social package offered vary depending on the size of the business and the specific nature of each of the Group’s companies.

In 2020, VTB Bank allocated about RUB 2.9 billion for social programmes, including RUB 1.6 billion (55%) for VHI. All of the Bank’s employees, including those on maternity leave, participate in the programme.

In 2020, VTB Bank allocated about RUB 2.9 billion for social programmes, including RUB 1.6 billion (55%) for VHI. All of the Bank’s employees, including those on maternity leave, participate in the programme.

**VTB’s social benefits for employees**

- **Health**
  - VHI Programme;
  - Management of pregnancy and labour;
  - Accident insurance.

- **Family**
  - Payment in addition to maternity benefit;
  - One-off payments for family emergencies;
  - Paid compassionate leave.

- **Financial stability**
  - Corporate pension programme;
  - Financial aid in the event of exceptional circumstances;
  - Payment in addition to the statutory amount of temporary disability benefits.

- **Improving standards of living**
  - Partial reimbursement of tuition fees under job-related higher-educational programmes;
  - Retirement and jubilee benefits;
  - Compensation of expenses in connection with moving to a new place of work;

Employee evaluation

Personnel appraisal is an integral part of VTB's HR management system, which is not only an important stage in the effective professional development of employees but also helps ensure objectivity in employee promotions.

The performance management procedure is a key instrument used by VTB Bank to assess employee performance. In 2020, this procedure includes an employee performance evaluation based on the results of 2019.

Also in 2020, we developed an employee evaluation system for cross-functional teams as part of the 600 Days programme. The evaluation of team participants’ performance was based on two parameters: personal contribution to achieving the team's goals and compliance with the Bank's values.

In order to create a corporate culture that emphasises leadership and performance, VTB Bank regularly carries out activities to assess and develop the competencies of managers and their teams.

In 2020, the number of assessment activities carried out increased by 2.5 times compared with the previous year. The results of the assessment helped participants take a more deliberate approach to further developing and improving their personal effectiveness.

A total of almost 1.3 thousand employees, from specialists to senior management, including 800 participants in the selection for the succession pool of the united regional network took part in the assessment of personal qualities in 2020. Approximately 1.7 thousand people were assessed for their IT competencies in 18 roles and specialisations.

Corporate Culture and Internal Communications

A well-developed system of internal communications, as well as well-established mechanisms for interaction between key process participants, are the most important factors for the successful functioning of the Group's business.

In 2020, systematic work was carried out to digitise internal communications channels. The project to create a new intranet portal was completed. It was transformed into a single entry point to key corporate resources and self-service services for employees.

The technical capabilities of the new portal allow employees to quickly find relevant and structured information on a variety of requests from various devices - from a computer, laptop, tablet or smartphone. The functionality of the personal account has been significantly expanded due to self-service services. The employee can view the information of interest regarding registration of vacations, calculation of bonuses and salaries, social benefits, and other information on labour management.

The portal also developed a digital version of the Team Spirit corporate magazine, which significantly increased its readership.

As part of the development of our communication channels, we created a community of 200 ambassadors, who create an agenda and generate unique news content from all of VTB's locations in the Russian Federation.

Dialogue with employees and channels for feedback

An open dialogue with employees is one of the signs of the company's organisational maturity. As a result, in addition to the main internal communication channels, such as the intranet portal and the Team Spirit corporate magazine, the Group's companies actively use the tool for feedback from employees.

One of the main feedback channels is communication between employees and their direct supervisors.

Another important channel for structured feedback is the VTB Group's employee engagement survey, which is conducted every two years. The survey helps assess the quality of corporate culture and the system of internal communications, the effectiveness of training programmes, satisfaction with the level of salaries, as well as the degree of employee motivation and loyalty.

Based on the results of the 2019 survey, a number of initiatives were implemented in the reporting period aimed at increasing the level of employee engagement. Particular attention was paid to expanding professional development opportunities for employees and improving the efficiency of business processes. In 2021, it is planned to conduct another engagement survey and assess the results in dynamics.
Gravity, a portal for employee ideas

As part of the development of employee feedback channels, VTB created a special employee portal, Gravity, which can be accessed by any employee at the Bank. The portal is an online space where employees can publish their innovative ideas on optimising working processes and propose novel ideas on the development of the Bank and its products.

The aim of creating the portal was not only to find new, original development ideas, but also to break down boundaries and give every employee at VTB Bank a voice in the process.

In 2020, over 20 thousand employees joined the portal, publishing 2.5 thousand ideas. Of these, over 70 were approved for implementation, while eight ideas have already been implemented in 2020. About 50 more ideas are planned for implementation in 2021.

In addition to working with ideas of employees, the Gravity portal develops a number of projects aimed at strengthening communication between employees, developing corporate culture and internal communications, as well as increasing personnel motivation.

Key projects of the portal

- **REQUESTS FROM DEPARTMENTS**: Ability to collect ideas from all employees on how to solve the challenges faced by the Bank's branches.
- **INNOVATION DIGEST**: Weekly email newsletter for all portal users.
- **VTB READERS’ CLUB**: Reviews of books read on the development of creativity, leadership, personal performance management, modern project management methods.
- **INNOVATIVE YOUTH CLUB**: A community for young employees to discuss and develop their ideas.
- **CONTESTS FOR EMPLOYEES**: In 2020, the portal hosted five contests, where about one thousand people took part.
Ensuring Work Safety

One of the VTB Group's most important social objectives is to ensure the right of employees to work safely.

The VTB Group occupational health and safety management system in place is aimed at creating a safe working conditions and protecting the health and life of employees.

As part of the Group’s efforts to improve working conditions, occupational risk assessments and special assessments of labour conditions were carried out at 21,487 workplaces belonging to VTB Group companies in 2020.

In 2020, more than 24,240 employees of Group companies were trained in safe working techniques, as well as in the skills of providing first aid.

For the purpose of dynamic monitoring of health status, timely detection of diseases, initial forms of occupational diseases, early warning signs of occupational exposures to harmful and/or hazardous factors on the health of VTB Group employees, 1,050 employees underwent medical examinations.

In 2020, the VTB Group had 24 injuries of varying severity. Each case was investigated in accordance with statutory requirements, followed by an analysis of the causes of injury.

Primary areas of occupational health and safety

1. Occupational risk assessment
2. Special assessment of working conditions at workplaces
3. Training employees in safe work practices
4. Mandatory medical examinations and certifications
5. Investigation of accidents and subsequent analysis of their causes
6. Development and annual update of an action plan to improve working conditions and occupational health and safety and reduce occupational risks

Occupational Health and Safety at VTB Group

In accordance with the Occupational Safety and Health Policy, the priority areas for VTB Group companies in 2021 include:

1. Ensuring preservation of life and health of employees
2. Meeting the statutory requirements of occupational health and safety
3. Improving and enhancing the effectiveness of the occupational health and safety management system based on analysis of workplace conditions combined with employee health assessment
4. Voluntary medical examinations
5. Investigation of accidents and subsequent analysis of their causes
6. Development and annual update of an action plan to improve working conditions and occupational health and safety and reduce occupational risks
In 2020, as part of the World Without Tears long-term charitable programme, 26 child welfare institutions received financial assistance for the purchase of necessary medical equipment, medicines, and consumables totaling 75 million roubles.
PROMOTING SOCIAL DEVELOPMENT IN THE REGIONS OF OPERATION

SIX MAJOR DEDICATED PROGRAMMES PROMOTE SPORTS, EDUCATION, HEALTHCARE, CULTURE, PRESERVATION OF TRADITIONS, AND BUSINESS DEVELOPMENT.

“We firmly believe that the economic performance and reputation of a reliable financial institution is inseparable from the social wellbeing of the population and the development of the regions of operation. Therefore, from year to year VTB conducts systematic work to improve the quality of life of people, making a significant contribution to the economic stability of the regions, showing concern for social development, maintaining cultural traditions and preserving the nature of the regions of operation.”

Natalia Germanova
Advisor to the President and Chairman of the Management Board, VTB Bank

Management Approach

VTB makes a solid contribution to the social and economic well-being of the regions where it operates, supporting professional and amateur sports, stimulating education and healthcare improvement, and taking care of cultural traditions. VTB invests significant effort in supporting local communities, the sustainable development of the regions, contributes to positive changes in society.

In 2020, VTB took part in over 2,000 charity and sponsorship events, of which 51 were organised by the Bank. VTB Bank’s total amount of support reached RUB 18.8 billion, with charity projects accounting for 37.4% (RUB 5.9 billion) and sponsorship projects 62.6% (RUB 9.9 billion) of the total. VTB Group as a whole spent a total of RUB 8.1 billion on charity in 2020.

VTB also has a subgroup of strategic projects (long-term projects of national significance). In particular, VTB supports the development of Dynamo Club in various areas (hockey, football, rugby, gymnastics, women’s basketball, football academy and others).

In order to coordinate and improve charitable activities in the regions of the Russian Federation, the corporate charity fund to support social initiatives and provide targeted aid, VTB Country, was registered in 2020 and became the main operator of regional charity projects, including the World Without Tears programme and aid to medical institutions in fighting the COVID-19 pandemic caused by a coronavirus infection.

Results

Decisions on expenditures for sponsorship and charity are made by the Sponsorship and Charity Committee, a permanent working collegial body of the Bank.

Moreover, the Committee oversees the designated use of allocated funds and reviews reports on the use of allocated funds.

VTB Country Charity Fund

In 2020, VTB took part in over 2,000 charity and sponsorship events, of which 51 were organised by the Bank. VTB Bank’s total amount of support reached RUB 18.8 billion, with charity projects accounting for 37.4% (RUB 5.9 billion) and sponsorship projects 62.6% (RUB 9.9 billion) of the total. VTB Group as a whole spent a total of RUB 8.1 billion on charity in 2020.

VTB also has a subgroup of strategic projects (long-term projects of national significance). In particular, VTB supports the development of Dynamo Club in various areas (hockey, football, rugby, gymnastics, women’s basketball, football academy and others).

Good Bike Ride >5 thousand participants

Moscow Music Bike Festival 500 participants

VTB Formula One Russian Grand Prix 2020

The Russian stage of Formula One today is one of the most prestigious international sporting events in the country. The race takes place in Sochi every year. The year 2020 was no exception: in September, despite the complicated epidemiological situation, the VTB Formula One Russian Grand Prix 2020 world championship round was held at the Sochi race track.

Due to strict observance of all required sanitary norms during the event, 120 thousand fans were able to watch the race. The race was broadcast live to more than 34 million people from around the world. For the fourth consecutive year VTB Bank became the title sponsor of the Russian Grand Prix, contributing to the development of professional motor sport in Russia and on the world level.
PATRIOTISM AND A COUNTRY OF TRADITIONS

Renewing national and religious values and preserving national heritage, fostering a sense of patriotism and an interest in Russian history, and supporting socially significant foundations.

Main projects

Support of cultural and historical heritage sites

- Valaam and New Jerusalem Monasteries
- Peterhof State Museum-Reserve
- The State Novgorod Museum-Reserve
- "Kizhi" State Historical Architectural and Ethnographic Museum-Reserve

Support of historical movie projects

- Feature film "Lev Yashin. The Dream Goalkeeper"
  - 100 million viewers of the first run on TV
- "The Terrible" TV series on Russia 1 TV channel
  - top 10 premiere series

"The Terrible" series on the Russia-1 TV channel

For many years VTB Bank has supported the production of serious historical films, which give a true picture of different periods in Russian history, as part of the "Patriotism and a Country of Traditions" dedicated programme. In 2020, the TV series "The Terrible" was broadcast by the Russia 1 channel. This historical drama shatters the stereotypical perception of Ivan IV by creating an artistic reconstruction of the personality of one of the most controversial rulers of the country. Such projects awaken interest in Russian history, telling about it in a colorful and accessible way, so they resonate with a wide variety of viewer audiences. According to the results of the survey of viewers "The Terrible" series was included in the top ten series of Russia-1 TV channel in 2020.

The series involved hundreds of actors in crowd scenes, about a thousand costumes - all of which contributed to the accurate transfer of the historical era. A large-scale scenery was built in the GLAVKINO cinema and television complex for the filming.
A CULTURED COUNTRY

Support for key Russian cultural institutions and their new projects, creative unions, and key channels for distributing cultural values*

The Yevgeny Vakhtangov State Academic Theater

75 free online broadcasts of performances – 150 thousand views

*The programme gives priority to projects that help achieve Russia’s strategic objectives for 2024 envisaged by a national project called Culture.

Establishment of a cultural and educational centre and rehearsal facility for the musicAeterna orchestra and choir at the Radio House

VTB Bank was a general partner for the creation of a cultural and educational centre and rehearsal facility for the musicAeterna orchestra and choir, one of Russia’s most popular musical bands led by Theodor Kurentzis. The goals of this project are to preserve and enrich the legacy of classical music, initiate students and young people into academic music, and educate a wide audience in the field of culture and art.

St. Petersburg Radio House, which served as a basis for the cultural and educational centre opening, has united creative and educational programmes, authors’ experimental and research projects covering all fields of contemporary art. In half a year of work more than 5 thousand people visited the events in the Radio House, and about 80 thousand viewers got access to video recordings of the cultural centre’s educational programmes.

In the context of the COVID-19 pandemic restrictions, a digital platform was launched in 2020, containing unique content from the musicAeterna band, allowing to stay in touch with the audience and live up to the creative potential of the artists. The audience of the platform amounted to 79 thousand people and continues to grow.
Charity support for healthcare providers and projects related to developing advanced healthcare technology

World Without Tears Programme

The World Without Tears charity programme was launched in 2003. Since then more than a hundred children's hospitals in 52 Russian regions have received financial support from VTB Bank. A total of RUB 200 million was allocated for this purpose.

In 2020, the World Without Tears programme campaigns took place in 26 medical institutions, four of which are in Moscow and 22 in the regions of the Russian Federation. Support is provided both to regional hospitals for the purchase of vital equipment and to federal hospitals, where children from all over the country are treated. In particular, VTB Bank provided Speransky Hospital, the largest children's medical institution in Russia, with funds to purchase equipment for its radiology and endoscopy departments. The total amount of support under the World Without Tears programme in 2020 amounted to RUB 75 million.

"Supporting Russian healthcare is one of the most important areas of VTB Bank's social activities. The aim of the World Without Tears programme is to make medical services as accessible and high quality as possible to children across Russia. Each year the Bank expands the geography of the project and includes hospitals in regions where no campaigns have previously been held. In 2020 the campaign was held for the first time in Birobidzhan, Jewish Autonomous region."

Natalia Kochneva
Head of Corporate Social Responsibility and Event Marketing - Senior Vice President

Financial support for educational institutions

10 leading Russian universities received funding, including for the renovation of IT systems (GSOM SPbSU, Higher School of Economics, MGIMO, Moscow State University, Financial University, Moscow Higher School of Social and Economic Sciences, FEFU, Russian University of Theatre Arts, All-Russian State Institute of Cinematography)

Educational online marathon One step ahead for finalists and participants of the VTB personal grants competition

10 leading Russian universities received funding, including for the renovation of IT systems (GSOM SPbSU, Higher School of Economics, MGIMO, Moscow State University, Financial University, Moscow Higher School of Social and Economic Sciences, FEFU, Russian University of Theatre Arts, All-Russian State Institute of Cinematography)

12 locations in eight cities:

• Moscow;
• Saint Petersburg;
• Voronezh;
• Novosibirsk;
• Nizhny Novgorod;
• Rostov-on-Don;
• Samara;
• Yaroslavl.
In 2020, with the active participation of VTB, a development strategy for GSOM SPbU for the next five years was developed. VTB participation as one of the largest employers in the country allowed to take into account the interests of the labour market as clearly as possible, as well as to create a set of the most effective tools to achieve the objectives.

Within the implementation of GSOM-2025 strategy the School jointly with VTB updated the Master in Corporate Finance (MCF) programme. The key task of the programme relaunch is to bring the graduate profile as close as possible to the needs of the labour market in the financial field. The authors of the courses are not only university professors, but also representatives of business practitioners, current employees of the financial departments of major Russian and international companies.

The Master in Business Analytics and Big Data programme, which trains managers in data analytics, machine learning or artificial intelligence project management, has also been improved. GSOM SPbU with the support of VTB strengthened the practical orientation of the training: a fully-fledged technology track was integrated into the programme, supported by a modern technological platform that allows students to try out modern IT solutions for working with data with their own hands.

"When VTB became part of the Advisory Board of Graduate School of Management at St. Petersburg State University in 2007, we noticed a similarity between our goals - the Bank’s ambition to be a global financial institution and the business school’s ambition to become a global player in the education market. Both organisations have long been integrated into the global business environment: VTB is a global player on the financial market, GSOM SPbU is a global business school. Both are united by the notion of ‘management’. Everybody needs good managers."

Olga Dergunova
Deputy President and Chairman of the Management Board of VTB Bank, Director of GSOM SPbU

Strategic Academic Partnership with Graduate School of Management at St. Petersburg State University

VTB and GSOM SPbU have been cooperating for almost 15 years. Since then the business school has become one of the leaders in the Russian education market, combining best academic practices and innovative ideas. In the Financial Times rating, GSOM SPbU ranks 51st in the world; in 2020, the business school moved up by two lines. The next goal is to become one of the top 50 in the world and one of the top 30 in Europe.
Main projects

Organising the VTB Capital’s annual investment forum named RUSSIA CALLING!

- Over 2.5 thousand guests, including:
  - >500 investors
  - 600 international delegates from 68 countries, government officials and heads of leading global corporations
- 3.1 million viewers of the video broadcasts

General sponsorship of the Strong Ideas for a New Time forum

- 15 thousand contest applications with ideas
- Contest objectives:
  - Restarting the economy and social sector;
  - Elaborating a technological strategy for the country’s development;
  - Organising teams ready to implement their ideas and projects, replicating practices capable of ensuring Russia’s sustainable development in the new economic environment
- 300 ideas made it to the finals

Support for the Startup Village 2020 online conference for first-time entrepreneurs and investors in partnership with the Skolkovo Forum ANO

- 80 interactive virtual sessions on technology trends, the development of new markets, transformation of business models and integrating breakthrough technologies into business practices
- VTB Bank receives official status as a Skolkovo Foundation key partner
- Three-year plan for an IT partnership, including the creation of VTB’s own research centre at the Skolkovo Innovation Centre
- 1.7 million audience members

Sponsorship of other business forums

- World Economic Forum in Davos
- CIS + WORLD International Economic Forum
- Russian Business Weeks (annual forum of the Russian Union of Industrialists and Entrepreneurs)
- Moscow Financial Forum
- The XII Ural Forum named Information Security of Financial Environment
The RUSSIA CALLING! Investment Forum in 2020 was organised in an online format for the first time. The Forum was broadcast on leading Russian and international media platforms and was accessible to viewers around the world. The Forum had participants and viewers from 103 countries. The online audience reached over 3 million viewers.

The forum discussed issues such as the development of the global economy under the COVID-19 pandemic, central bank monetary policy, labour productivity and employment, financial instruments in a changed reality, transformation and adaptation of business processes in a new environment and technologies for a secure future. During the two days of the forum, the participants were able to identify the tools that would help to cope with the consequences of the pandemic as efficiently as possible. The forum included a macroeconomic plenary session with Russian President Vladimir Putin.
About the Report

Contents of the Report

Entities falling within the scope of the Report were determined on two criteria: control over the entities’ activities (more than 50% of voting shares held by VTB Bank) and/or importance in terms of the entities’ economic, social, and environmental aspects. Unless otherwise indicated, the financial information regarding the VTB Group is presented as stated in VTB Bank’s consolidated financial statements as of 31 December 2020, prepared in accordance with International Financial Reporting Standards.

Approach to determining material topics

This Report presents information on Group companies’ sustainable development activities. As the Group’s reporting systems differ, some of the quantitative indicators presented in this report refer only to the Bank’s performance.

This Report has been prepared in accordance with the GRI Standards: Core Option. In order to comply with the recommendations of the GRI Standards, a procedure was conducted to identify material topics that had to be included in the Report, including a stakeholder survey.

Identifying material topics to be included in the 2020 Sustainability Report

Step 1 Identifying all material topics

Material topics were identified via interviews with the heads of relevant business units, reviews of non-financial reports issued by domestic and foreign peer companies, and the analysis of internal regulations and media coverage.

Step 2 Prioritising material topics

To identify how important each material topic was to stakeholders, we surveyed employees, top managers, nonprofit organisations, shareholders, and business partners.

Step 3 Building a materiality matrix

We created a materiality matrix to highlight the most significant sustainability topics based on their influence on both the stakeholders and corporate strategic goals.

Step 4 Validating material topics

We identified material topics expertly evaluated for completeness and balanced presentation and determined limits of coverage for each of the topics.

The VTB Group of Companies falling within the scope of the Report

</table>
| Charitable donations, RUB billion | Those refer to charitable contributions made by Group companies (within the scope of the Group’s consolidated financial statements) within the reporting period. Where charitable donations were made in foreign currencies, these were converted into roubles using the average exchange rate from the Bank of Russia for the year.
| Number of sales offices, including number of sales offices in underpopulated and economically underdeveloped regions of Russia | The number of sales offices is determined by summing up the offices of Group banks, excluding retail desks and POS terminals. Sales offices in underpopulated and economically underdeveloped regions are those located in regions with a lower population density (less than 60% of Russia’s average) or lower income per capita (less than 65% of Russia’s average), according to state statistics. |
| Fuel (petrol and diesel) consumption, thousand litres | The volume of fuel consumption by all Group companies in the reporting period. The amount of paper consumed was determined by converting the number of paper packs used into metric tonnes. Where there was no information on the weight of an A4 or A3 sheet pack, average values were used (2.5 kg and 4.8 kg, respectively).
| Direct and indirect GHG emissions, in tonnes of CO2 equivalent | This refers to direct (Scope 1) and indirect (Scope 2) energy GHG emissions by all Group companies in the reporting period. Direct GHG emissions were determined based on the amount of fuel (gasoline and diesel) consumed. Indirect GHG emissions were determined based on the amount of electricity and heat energy consumed.
| Average headcount, people | The average headcount is a number of Group companies’ employees for all months within the reporting period (including weekends and holidays) divided by the number of calendar days in that month. The average headcount for the reporting period is the number of Group companies’ employees for all months within the reporting period (including weekends and holidays) divided by the number of months in the reporting period. Part-time employees as defined by their employment contracts are counted proportionally to the number of hours worked.
| Accident frequency rate | This refers to the accident frequency rate across all Group companies (within the scope of this Report) in the reporting period. The accident frequency rate is calculated by the number of accidents per one thousand employees.
| Headcount by gender and employee category | This refers to the number of full-time employees, excluding external part-time employees and independent contractors at the end of the reporting period. A part-time employee on an employment contract counts as one employee in the said headcount. The data is broken down by employee category (full-time/part-time) and by gender.
| Average hours of training per year per employee | This refers to the total hours of employee training divided by the average headcount for the said period (within the scope of this Report, excluding VB Servis LLC and Sarovbiznesbank PJSC).
| Employee turnover | The total employee turnover (outflow of staff) indicator is calculated as the ratio of the total number of employees who left the company (including retirement or death) during the reporting period to the average headcount.

**INDICATOR**

**DESCRIPTION**

- **Corporate governance**
- **Procurement transparency**
- **Economic performance**
- **Financing national projects**
- **Responsible banking**
- **Responsible Investment**
- **Customer satisfaction**
- **The affordability of banking products and services.**

**Environmental category**

- **Green financing**
- **Waste management**
- **Reducing energy consumption**
- **Reducing fuel consumption**
- **Reducing greenhouse gases and emissions**
- **Reducing fresh water consumption**
- **Partner projects in the ecology field**

**Social category**

- **Responsible business practices**
- **Corporate culture**
- **Occupational health and safety**
- **Personal training and development**
- **Initiatives for young people**
- **Personal engagement**
- **Charity and sponsorship**
We have been engaged by PJSC VTB Bank to perform a limited assurance engagement, as defined by International Standards on Assurance Engagements, (herein ‘the Engagement’), to report on PJSC VTB Bank (hereinafter ‘the Bank’) material performance indicators included in the Sustainability Report and identified there by the symbol (hereinafter ‘the Indicators’), as of 31 December 2020 or for 2020 (hereinafter ‘the reporting period’):

► Number of sales offices including number of sales offices in underpopulated and economically underdeveloped regions of Russia (pages 7, 87 of the Report);
► Average headcount (pages 117, 165 of the Report);
► Headcount by gender and employee category (pages 6, 117, 165 of the Report);
► Average hours of training per year per employee (pages 6, 118, 124 of the Report);
► Total employee turnover (outflow of staff) (page 6 of the Report);
► Charitable donations made (pages 7, 138 of the Report);
► Accident frequency rate (page 135 of the Report);
► Electric energy consumption (pages 6, 111 of the Report);
► Direct and indirect GHG emissions (page 111 of the Report);
► Fuel (petrol and diesel) consumption (pages 6, 111 of the Report);
► Paper consumption (pages 6, 111 of the Report).

We conducted our assurance engagement in accordance with International Standard for Assurance Engagements (revised) ‘International Standard for Assurance Engagements — Other Than Audits or Reviews of Historical Financial Information’ (hereinafter ‘ISAE 3000’). ISAE 3000 requires that we plan and perform our engagement to obtain limited assurance about whether, in all material respects, the Indicators are presented in accordance with the Criteria, and to issue a report. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risk of material misstatement, whether due to fraud or error.

We believe that the evidence obtained is sufficient and appropriate to provide a basis for our limited assurance conclusions.

Our independence and quality control

We apply International Standard on Quality Control 1 (ISQC 1), and accordingly, we maintain a robust system of quality control, including policies and procedures document ing compliance with relevant ethical and professional standards and requirements in law or regulation. We comply with the independence and other ethical requirements of the IESBA Code of Ethics for Professional Accountants, which establishes the fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behavior.

Summary of work performed

The assurance engagement performed represents a limited assurance engagement. The nature, timing and extent of procedures performed in a limited assurance engagement is limited compared with that necessary in a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is lower.

We have performed the work of an assurance engagement for the purpose of expressing a conclusion on this information. The work of an assurance engagement is planned and performed to obtain limited assurance about whether the Indicators are presented in accordance with the Criteria, and to issue a report. The nature, timing and extent of the procedures selected depend on our judgment, including an assessment of the risk of material misstatement, whether due to fraud or error.

We believe that the evidence obtained is sufficient and appropriate to provide a basis for our limited assurance conclusions.
